Ishinomaki Laboratory — Made In Local

Creating parallels between the endless versatility of Ishinomaki furniture and the flexibility of a contortionist to fit into any space — this inspired our campaign.

KERNEL is a furniture and lifestyle brand that aims to put good design in every home.

KERNEL curates and creates designs that tell unique stories, are novel in design and value attention to detail. We believe that your home should reflect who you are and create a harmonious environment that brings out the best in you.

With the harmony of functionality and form at the forefront of our ethos, KERNEL works with acclaimed designers around the region to offer thought-driven, innovative designs that thrive in all spaces. Design doesn't stand still, neither do we. That is why we are always working on bringing you novel ideas in home furnishing.

# KERNEL

## The Team

Growing up in a family where furniture was very much part of life, our founder, Jason Song teamed up with his two friends, T Y Zheng (ACRE) and Melvin Keng (Kaizen Architecture) to bring KERNEL to life in 2021.

KERNEL adopts a human centric approach to design so as to enrich any home or office.

## Made In Local Singapore

The Made In Local programme is an international partnership initiative that celebrates local craftsmen through active collaboration. Merging material localisation with cultures through honest design, the programme enables local producers to manufacture Ishinomaki Laboratory's designs with their own unique take.

## Ishinomaki Laboratory

Established with the purpose of building the future one step at a time, Ishinomaki Laboratory was founded in 2011 as a simple, public workshop for the local community devastated by the events of the Great East Japan Earthquake. Starting from a series of DIY workshops aimed at restoring and renovating the community, Ishinomaki Laboratory has since grown into a company that defines a new take on handmade craft.

Ishinomaki Laboratory's approach to design continually pushes the horizons of DIY. With creating spaces and sharing experiences as the focal point of their philosophy, the power of good design becomes a means to energise people and communities. Their aim is to enrich everyday life by encouraging people around the world to rediscover their own innate creativity.
