Coffee Table

White marble coffee table by Timothy Oulton

Bring a touch of glamour to your entertaining space with the Junction Marble coffee table. Smooth, uninterrupted planes of luminous white marble catch the sunlight beautifully and bring a sense of calm and refinement to the wild outdoors. Marble's naturally porous surface will develop its own patina with use and wear, etched with its own story over time. Each marble table top will have its own individual marble graining, as it's natural material, and will be very, very similar to the pictures shown. Best suited to covered areas outside with some protection from the elements, or looks beautiful indoors in your living room.
