Product description:

A mobile and versatile side table. The table is visually very light as the tabletop is only mounted on one leg and therefore seems to hover in the air. This makes it suitable as a side table for a sofa or armchair, as a bedside table or simply as a freestanding table.

Designer's thoughts:

"The development of the Stilk Side Table started with the idea of creating an extremely light construction that rests on a solid monolith. Our aim is to challenge the construction of a table and make something which seems to hover in the air. Through studying bent surfaces and counterweights we figured out the mould of the tabletop." – Herman Studio
