

WALL HOOK FOR STEP BY STEP LADDER

Mount the wall hook on the wall, to let Step by Step Ladder become a decorative object when not in use. Follow the steps below to mount the hook correct.

1. Measure where the hook must hang on your wall. Minimum 64 cm. above the floor and skirting boards.
2. Drill a hole (bit Ø8) and use the included rawlplug.

The threaded screw must protrude a maximum of 15 mm. The 3rd step is important to prevent the wooden hook from splitting during installation.

3. Use the including torx key to mount the threaded screw.
