

2022 PROFESSIONAL REDFISH LEAGUE

PRL DIVISIONAL TEAM OF THE YEAR

Divisional TOY weights may be accumulated in as many divisions as a team wishes to participate.

Divisional TOY weights remain within a **specific division only** (Florida, Louisiana, Texas South or Texas Southeast). Divisional Team of the Year is determined by accumulated weight from each of the 3 divisional tournaments, plus the total weight from the first two (2) days of the Championship. The team with the highest total weight within that division for that year will be deemed Divisional Team of the Year.

Example:

Team PRL fishes Texas South Division

TX South Tournament 1: 38.03 lbs

TX South Tournament 2: 37.34 lbs

TX South Tournament 3: 37.54 lbs

TX South Total weight before Championship: 112.91 lbs

Championship Day 2 weight: 42.46 lbs

Total weight for TOY: 155.37 lbs
