Colors: Made to *impress*

While regular watches offer 2 to 3 basic color options, the Chivalry has many colors. The palette is filled with 7 stunning watches, from two-tone combinations to single ones. Specifically, red-silver, yellow-black, orange-silver, black-grey, blue-grey, & copper-black comes under two-toned watch colors, and another is black with a black carbon fiber case.

The Bezel: *The Most Versatile Ring*

This brilliant watch is ready to travel with a hand-polished 316L stainless steel & carbon fiber. Utilizing Super-LumiNova GLC3 Swiss super luminous on the hour markers and hands illuminate the mesmerizing dials. The Lume is non-radioactive, REACH compatible, high temperature resistant, and resistant to environmental influences.

The Movement: *The Real Mechanisms*

The Chivalry adopts a fully 21 jewels automatic movement- MIYOTA 8215. The watch is more accurate in timekeeping and operates at 21,600hz. Power reserves also rest at 40 hours. Breaking the traditional division of time, we've created the concept of 4 equal parts of time for the first time in the watch industry.

The Strap: *Holding Everything Tight*

The Chivalry quick-release strap is made of high-quality fluoro rubber, anti-odor, and anti-corrosion, with gentle tear-resistant properties on the skin. The wristband's ergonomic design incorporates human engineering, thus greatly improving the watch's comfort. Plus, the user can wear it for longer periods without discomfort or uneasiness.

The Case: *Reflecting Everything Clearly*

Our watch case differs from the ordinary. At a width of 47.1mm, we believe it's a perfect size that looks stunning on every wrist size. The hand-polished 316L stainless steel offers an exceptionally high-quality stainless case that fits perfectly with the watch's design.

The Glass: *Taking the Hardest Hits*

The Chivalry glass is made up of high-grade sapphire glass, which is 9 on the Mohs scale, being nearly unscratchable. Coated with Ion Plating or IP, glass delivers a durable finish and adds a protective layer to the surface. This further protects against scratches and everyday wear and tear.

Handling water pressures *lightly*

5ATM water resistance is sufficient to handle showers and rainfall and perform light water-based activities. To feel the watch still

running without fear in the running water is the embodiment of our craftsmanship and technology and the charm of our pursuit of high-quality watches!
