

AATTASustainable Eyewear

MITA Eyewear is a brand pioneering the use of <u>sustainable</u> <u>materials</u> in sunglasses and optical eyewear. Emerging from Miami, MITA's sustainable eyewear brings to life the eclectic fashion sense and multicultural background of the ever-changing Magic City. Our products are made with the highest and <u>finest quality</u> materials, combining the expertise of <u>Italian craftsmanship</u> and the know-how of the best factories around the world.

The MITA collection includes both <u>optical and sun wear</u> styles, catering to a culturally diverse audience of men and women. All of MITA's products are made from eco-friendly materials like <u>recycled water bottles</u>, <u>recycled aluminum</u>, <u>and sustainable lenses</u>. We also take pride in the fact that even our packaging is made from 100% sustainable materials.

our materials

Recycled Plastic Bottles

At MITA, we are passionate about making a positive impact on sustainability through our <u>upcycling</u> process, which repurposes RPET <u>water bottles</u> to create high-quality stylish eyewear, saving them from littering our oceans. Through our "Reshape" philosophy, we're pioneering the use of sustainable materials in eyewear.

Recycled Aluminum

We use Aluminum in our frames for the same reasons it is used for everything from planes to iPhones — it's lightweight, resistant to corrosion, hypo-allergenic, and can be curved, bent, and welded to any shape. But, most importantly for us, Aluminum is the most <u>environmentally friendly metal</u> on earth and can be recycled without any degradation. This is why it's called the "green metal".

our materials

Sustainable Lenses

All of MITA's eyewear - from our sunglasses to our optical styles - are made with sustainable lenses. Our optical styles come with sustainable <u>blue block lens technology</u> that reduce the risks associated with everyday exposure to harmful blue rays emitted from LED screens. Our sunglasses are available in a stylish selection of colors and tinted lenses to fit your unique style and protect your eyes with <u>100% UVA/UVB</u> protection.

Our Packaging

Our packaging is sustainable and made using recycled & recyclable materials.
