

# Memory Doors

## Supporting the needs of Older Adults

### What are Memory Doors and what makes them special?

Aged Care residences can be confusing for some people to find their way around, particularly when all doors in a hallway can look the same. This can be particularly confusing and distressing for those people living with dementia. Memory Doors are an easy solution to help people recognise and find their room, supporting their wellbeing, privacy and sense of safety.

They can also transform impersonal hallways that are often found in Aged Care residences to be more homelike, creating a more comforting and friendly space to reside in.

### Benefits of Memory Doors

**Benefit #1:** Reduces stress, aiding in the development of a peaceful environment

**Benefit #2:** Aesthetically pleasing graphics can create a welcoming atmosphere

**Benefit #3:** Increases safety for people living with dementia

**Benefit #4:** Residents can be involved in selecting their own memory door design

**Benefit #5:** Non-damaging surface safe material

**Benefit #6:** Easy to install by maintenance staff or installation can be arranged.

## Introducing our range of Memory Doors

# Create your own custom-tailored Memory Door

**Anything is possible!** You can now create a front door that is meaningful to a person, like a front door similar to where they used to live, to be placed on the door to their room in the aged care residence.

**Add a door number**

**Add a door label**

**Take a photo of a residents door**

You can fully customise your Memory Door to make it uniquely yours

 **Let's start creating!**

Get in touch with our team today to choose from our wide range of Memory Doors or to discuss how we can create customised Memory Doors for your aged care residence.
