THE ORIGINAL & THE BEST ANTI-FLAP KIT

The original & the best, the Aussie Traveller Anti-Flap Kit (AFK) is a must for every home on the road.

The Aussie Traveller Anti-Flap Kit (AFK) has stood the test of time. The AFK is easy to install, and will protect and keep your awning in perfect condition by securing the fabric to prevent wind flap.

Featuring the in-built smart 6mm sail track design, the AFK allows you to easily install walls, annexes and accessories, giving you more time to enjoy your holiday. Sliding in walls creates a waterproof seal between the awning fabric and the wall.

The strong clamps attach to the outer edge of the awning to provide stability and prevent damage to awning fabric in windy conditions thanks to the extra support and stability. The AFK is finished in high-quality powder coating in your choice of black or white to compliment your awning perfectly.

Specially designed to suit all types of roll-out and cassette awnings, the AFK is available in 3 sizes to suit most awning projections.

The Aussie Traveller AFK has stood the test of time through decades of testing, with Aussie Traveller recognised as the creators of the original and the best Anti-Flap Kit.

CURVED ROOF RAFTER

The Aussie Traveller Anti-Flap Kit pairs perfectly with our Curved Roof Rafter (CRR). CRR assures water cannot pool when the vinyl awning is projected and keep the vinyl taut.

STORAGE BAG

The Anti-Flap Kit & Curved Roof Rafter Storage Bag helps protect your AFK & CRR when they are not in use and has the ability to store a full AFK and up to two CRR's in it's 6 pockets. Made from our sturdy Eurowall Fabric, the storage bag is strong with a sleek black and grey design.

FEATURES

- Quick & easy setup
- Protects the awning from wind-flap
- Easily attach walls, annexes & other accessories
- Available in black or white
- 3 sizes to suit both roll-out & cassette awnings

For full specifications and pricing see our website. For trade & wholesale pricing please speak to one of our sales reps.

HOW TO INSTALL YOUR ANTI-FLAP KIT

The Anti-Flap Kit breaks down to 4 individual sections (2 pieces per end), when joined together form a full-length clamp. This full-length clamp holds to the awning fabrics outside edge to prevent wind flap.

Installing the AFK is simple, follow these steps:

- Fit the hook end clamps into the wall bracket fixed to side of van.
- Ensuring the top clamp handles of the AFK are in the open position, lift up the AFK until the AFK rests under the awning fabric.
- Extend the AFK out until the round spigot end fits into the hole in the roller. Ensure the AFK is fully extended and tighten the knurled knob. Repeat for side 2.
- Hold the fabric in position on top of the AFK at the gap in middle of the two sections with one hand and tighten the locking cam handles with the other hand.
- Ensure the fabric is fully secured at the gap between the two sections of the AFK. Repeat for side 2.

HOW TO MEASURE YOUR AWNING FOR AN AFK

Measure the awning extension from the wall of the vehicle to the roller tube, to determine the correct Anti Flap Kit length required. Please refer to the diagram below.

REMINDER: Ensure awning is fully rolled out and open as normal.

FITTING AN AFK TO CASSETTE & OTHER AWNING BRANDS

Adding AFKs to your Cassette awnings is possible by using either a 100mm extension for awning projection up to 2.60m or a 300mm extension for projections up to 3.00m.

BRISBANE SHOWROOM: 11-15 Oasis Court, Clontarf QLD 4019 | **MELBOURNE SHOWROOM:** 235 Barry Road, Campbellfield VIC 3061

CURVED ROOF RAFTERS

Easily keep your awning taught, prevent wind-flap damage and stop water pooling.

Made to our exclusive design curve and shape, the Aussie Traveller Curved Roof Rafter (CRR) helps to prevent wind flap and sagging in the fabric of the awning and assists water run-off in the rain. The curved design of the Curved Roof Rafter protects against damage and marking to the awning fabric.

Our high-quality Curved Roof Rafters are available in a Maxi Curve and a Mini Curve design, suitable for most rollout awnings. Curved Roof Rafters for Coolabah Awnings feature ends designed exclusively for our Coolabah awnings.

The Mini Curved Roof Rafters are our standard sizing, suitable for awnings of all widths and differing projection on RVs, Caravans and Pop-tops. With their 95mm radius arch height, the lower radius design also reduces the chance of marking or stretching the vinyl fabric.

The Mini CRR can be used on cassette awnings that project out 2.5m when used in conjunction with an AFK/CRR spigot bracket.

The Maxi Curved Rafter has a 125mm radius and is recommended for buses and vehicles with taller wall heights. On longer awnings, it is recommended to also use a Curved Tension Rafter in conjunction with Maxi Curved Rafters.

We also offer the Curved Tension Rafter. This design is a CRR with a Maxi curve and fitted with a tension arm to prevent longer awning roller tubes from bowing by the lever action exerting pressure. This is ideal for longer awnings; 18' and over.

The Aussie Traveller Curved Roof Rafters (CRR) pair perfectly with our Anti-Flap Kits (AFK) to keep your awning secure and taught. Easily store your Curved Roof Rafters and Anti-Flap Kits together in our AFK & CRR Storage Bag.

FEATURES

- Easy to use and install.
- Protects awning fabric.
- Available in 4 designs.
- All designs available in white.
- Standard Curved Roof Rafter available in white & black.
- Fitting brackets included.
- Suitable for most rollout awnings.

The curved design prevents water pooling.

Easily install into fitting brackets supplied.

DE-FLAPPERS

The compact and easy way to stabilise your awning and protect the fabric from wind damage.

The Aussie Traveller De-Flapper range keeps your awning fabric in place whilst reducing wind flapping noise. No matter the set-up, we have the perfect de-flappers for you.

To set-up simply attach the De-Flapper to the awning, wrap the velcro straps provided around the awning pole and secure tightly to prevent wind flapping. No tools needed to set up.

The De-Flapper range comes with both short and long velcro straps, the longer strap is generally used for pop top caravans due to the extra distance to the fabric from the pop top awning arms.

SINGLE DE-FLAPPER

PART NUMBER: 266309000

AWNING SAFETY STRAP KIT

For extra security in windy conditions, the Awning Safety Strap Kit will secure your awning so it stays in place.

This Awning Safety Strap Kit offers added security and assurance that your awning will not lose tension and keep your barrel in place during windy conditions. It attaches to your van over the awning vinyl, anchors over the top of the awning to the ground.

Made from high quality material, the awning is secured using the rope supplied.

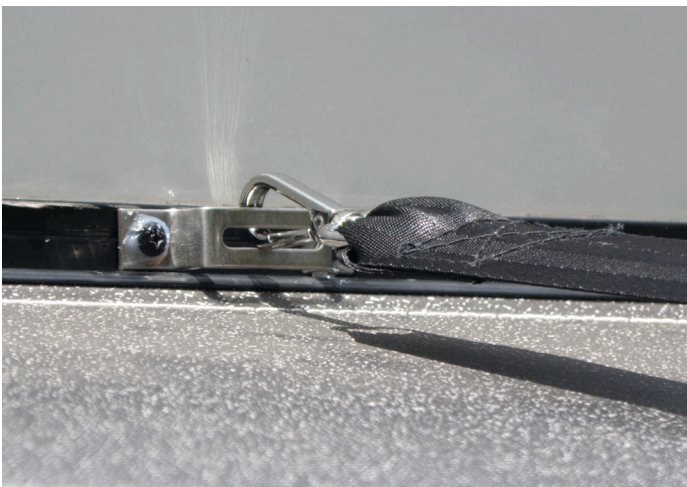

FEATURES

- High quality material
- Adds extra stability to your awning in windy conditions
- Includes ropes for anchoring the awning to the ground

PART NUMBER: X018502

PLEASE NOTE:

- *Brackets and pegs are not included in this kit.*
- *A bracket above your current awning sail track is required, as well as a peg to secure it to the ground.*

AWNING SUPPORT CRADLE

Keep your awning from bouncing and flexing as you travel on road.

Our Awning Support Cradles are suitable for any roll-out awning, gently supporting the weight and natural sag in the middle of the roller.

As you unroll your awning, the cradle pivots away from the fabric, ready to accept the roller again when retracting. The high pressure die cast components maximises strength and eliminates sharp edges.

Suitable for use on most brands of roll-out awnings with a roller tube and available in white or black powder-coated finish to match your caravan.

FEATURES

- Gently supports your roll-out awning
- Prevents sagging in the roller tube
- High pressure die cast components
- White or black powder coat finish
- Includes mounting screws
- Recommended to be fitted on roll-out awning installations of 15' & above

AWNING ARM PROTECTOR

Aussie Traveler's Awning Arm Protectors will keep your awning frame looking brand new.

Our Canvas Awning Arm Protector is designed to help protect your awning arms from dents, chips and scuff marks whilst travelling.

Made from heavy duty Ripstop canvas and a blue PVC inner lining, it easily attaches to any awning arm with the Velcro fastening straps. The Awning Arm Protector is padded to provide bounce back should anything accidentally hit your awning frameset.

FEATURES

- Protect you awning arms from stones & scuffing whilst travelling
- 420gsm Ripstop canvas
- Black padded canvas
- PVC blue inner lining
- 4 Velcro fastening straps
- Product sold individually

SNAP ON AWNING PROTECTOR

Keep your awning safe and protected against damage while in storage.

Lightweight moulded UV resistant plastic which snaps onto the roller over the fabric to protect it when stored.

Available in 2m lengths which can be cut to size. Comes with built-in joiner.

To measure your awning for the awning protector, measure centre of arm to centre of arm. You will need 2 pieces for awnings up to 13ft long, 3 pieces for 14–19ft awnings, 4 pieces for awnings 20–25ft long.

FEATURES

- Lightweight PVC
- Built-in joiner
- Simple installation - just snaps on
- 2m lengths that join together to fit multiple lengths of awnings
- Can be cut to make a custom fit

PLEASE NOTE:

- *Not for use while travelling.*

ROLL-OUT AWNING CLOTHESLINE

The ultimate space-saving laundry solution for your caravan.

The innovative Awning Clothesline cleverly attaches to your awning, providing the ideal area for drying clothes during your travels.

No complex installation required as it simply attaches to either the inside or outside of your awning. This clothesline is extremely strong and will fit awnings measuring between 8-25ft. It also comes with a carry bag.

The innovative design also helps to protect your roll-out awning from distortion of the awning tube and frameset. Installation of the Aussie Traveller Roll-Out Awning will not void your awning warranty, unlike other models currently available.

FEATURES

- Space saving & durable
- Simple to set up
- Options to suit most roll-out awnings
- Carry bag included

PLEASE NOTE:

- *There is 18m of cable supplied, only use 2 lines on awnings over 17ft long.*
