

BIKE RACKS

THULE BIKE RACKS

THULE BIKE RACKS

Thule bike racks are expertly designed to make it safe and easy to transport your bike.

Caravan bike racks are mounted on the rear wall or the A-frame of your vehicle, and you can even use them to transport e-bikes. The wide range of fixation systems, developed with and approved by caravan manufacturers, ensures a perfect fit. Once mounted, you'll have a secure, sturdy and stylish rack, packed with smart features. The tiltable A-frame bike racks also provide easy access to the front locker of the caravan.

Made from extra strong aluminium to guarantee stability and reliability, Thule bike racks have been leading the way for years. They are TÜV-approved and no wonder as they've been tested to the limit and beyond at the Thule Test Center. There Thule bike racks must pass stringent crash tests and tough usage simulations, not to mention survive extremes in heat, cold, rain, sun and even harsh chemicals.

Thule bike carriers adjustable wheel holders make sure you can almost fit any bike on the bike rack, from mountain bikes to children's bikes. Models such as the Caravan and Excellent ranges also have the ability to carry e-bikes.

You will be able to adventure in the outback and off-road without worry thanks to all Thule bike racks sporting a lockable platform. The platform lock creates excellent dynamic force control and perfectly secures your bikes during transport. The platform is locked manually (or automatically on Thule Excellent models) and can easily be clicked in the upwards position when not in use. When fixing the bikes to the carriers, it is important on all models the heaviest bike is fixed inwards with the lightest bike fixed outwards.

CARAVAN RANGE

The Caravan Range of Thule Bike Carriers have been developed to fit all types of A-Frames thanks to the specially designed platform and base frame with open front.

The Caravan Superb range can support e-bikes and be extended to hold up to 3 bikes with the rail kit. Caravan Smart are able to support 1 e-bike.

Featuring an Adjustable Tilt-Stop system for one-hand handling and protection of the car, the Caravan Smart and Caravan Superb bike racks provide easy, full access to the front locker of your caravan. The maximum angle to tilt the bike carrier can be set as you desire. The Caravan Light features a partial tilt with foam bumpers prevent the bike from being damaged during transport.

EXCELLENT RANGE

The Excellent range is Thule's most elegant bike rack with a large load capacity. They are designed for rear mounting on motorhomes and caravans, with the option to extend the standard 2 bike holder up to 4 bikes with the additional rail kits.

The Excellent bike carriers are also designed for e-bikes with a strong built frame, with a load capacity for up to 60kg.

Featuring an easy-to-adjust system – the rails can move sideways, back and forward, even with your bikes on the carrier. The rails easily slide to make sure you find the best position for your bikes without effort.

The Excellent also features extremely user-friendly pump buckles. The pump buckles on the adjustable wheel holders help set up your bikes by offering easy and fast fixation of bikes.

As standard on the Excellent range, efficiently and simply secure your bikes on your bike carriers thanks to the Thule key lock system.

ELITE RANGE

Thule's Elite range is the perfect all-round range of bike racks. With options for caravans, vans, and motorhomes, there is the perfect bike carrier for your particular need.

Thule Elite Van XT is a sturdy, easy-to-use bike rack for vans with a quick installation process that doesn't require any drilling. Smart design makes it easy to load your bikes and with the help of the Thule AcuTight torque limiter, you'll know when the bikes are securely in place. Even with bikes loaded, you can still conveniently open the van doors and at the end of the season, the bike rack is easy to dismount.

The Elite G2 is rear-mounted on caravans and motorhomes and can be extended from holding 2 bikes to 4 bikes with the additional rail kits.

LIFT V16 RANGE

The Lift V16 is a bike rack with an adjustable platform for easy loading and unloading. The ergonomic design lowers the bikes to an easier to access height—a great option for those with lower mobility.

The base can be lowered and raised by using a crank on the manual version or by the motor on the 12V electric version, making the installation of the bikes effortless.

The platform lock on the Lift V16 creates excellent dynamic force control and perfectly secures your bikes during transport. The platform is locked manually and can easily be clicked in the upwards position when not in use. The lifting frame is nice and tight during the ride thanks to integrated safety straps.

The Lift V16 can hold up to 3 bikes with the optional 3rd rail kit.
