PRODUCT INFORMATION

ANTI SKID

Description

A fine grade pumice powder that can easily be blended into all paints to produce a slightly rough textured finish to obtain a non slip surface.

Mixing

Mix powder at a rate of 85 grams to 1 litre of paint.
Higher levels will produce a rougher finish if required

Add the powder while stirring the paint with a broad flat stirrer.

Stir the paint occasionally to keep the powder uniformly suspended in the paint.

Only add to the final coat.

Pack Size

340 gms and 850 gms

Revised January 2021
