PRODUCT INFORMATION

FLUTEBOARD PRIMER

Description

Fluteboard is a general name given to lightweight board made from polypropylene. Unless it is corona treated most paints and inks have adhesion problems. Vipond's Fluteboard Primer is a solvent based product that has excellent adhesion to polypropylene.

Use

As a primer on fluteboards and on other polypropylene surfaces. It dries very quickly and can be top coated with enamels and water based acrylics. Due to variations in fluteboard it is important to confirm suitability before use. It can also be used as a primer on HDPE and LDPE

Surface Preparation

Clean the surface with Vipond's Prep Wash - Saturate a clean cloth with Prep Wash and rub the surface.

Application

Stir the paint well then apply a thin even coat with brush, roller or spray. This product "tacks off" after 5 minutes and laying off with a brush or roller must be done quickly.

Drying

Under normal drying conditions (above 15 deg C) it will be touch dry within 15 minutes and can be top coated with enamels or water based acrylics in one hour.

Solvent

Product is ready for use, but if thinning is required use mineral turpentine for brushing and rolling, or Vipond's Fast Dry Thinners for spraying.

Coverage

Approximately 16 square metres per litre.

Pack Size 1 litre cans

As the substrates that are used and the methods and conditions of application of this product are beyond control of Vipond's Paints Pty. Ltd. it is recommended that the customer tests the product for their own particular application.
