### **PRODUCT INFORMATION**

## **STRIPPABLE COATING**

### **Description**

**Vipond's Strippable Coating** is a clear water thinned paint that when applied to a non-porous surface (eg glass, metal, plastic, vinyl etc) and allowed to dry, it can be peeled off without affecting the surface.

### **Use**

It can be used to mask surfaces prior to painting or as a coating to protect surfaces against scratching, staining or marking. Not for long term exterior use outside unless overcoated with an exterior paint.

### **Surface Preparation**

Ensure the surface is dry and free of dirt, grease and oil.

### **Application**

Thoroughly stir and apply with brush, roller or spray. It is important to apply a thick coating (approximately 2 - 3 mm wet coat) to allow easy removal. Apply one heavy coat or two medium coats. It is an interior product because of poor water resistance. A topcoat can be applied to improve water resistance for exterior use.

### **Drying**

Under normal drying conditions (above 15°C) it will be touch dry within 1 hour and through dry in 4 hours. Drying times are dependent on the film thickness and drying conditions.

### **Coverage**

Approximately 5 square metres per litre

### **Clean up**

Thin and clean equipment with water.
