PRODUCT INFORMATION

GOLDSIZE

Description

A fast drying oil based clear varnish that can be used for a variety of applications

Use

Goldleaf – As a sizing medium for goldleaf work.

Gold, Silver and Copper Paint – as a medium to add metallic pastes (gold, silver and copper) to make an enamel paint.

A fast drying clear – clearcoat for glass, metal and timber. It has limited exterior durability as a clear topcoat.

Enamel additive – add to Feature Gloss Enamel to adjust viscosity, improve drying time and film hardness. Especially useful when spraying for gloss enhancement and drying time.

Application

Thoroughly stir the paint and apply with brush, roller or spray.

Drying

Under normal drying conditions (15°C and low humidity) it is a whistling tack of 30 minutes and through dry of 12 hours. It maintains this tack for about 10 minutes. To slow the drying further for goldleaf work mix with a mixture of pale boiled oil and terebine.

Cleaning and Thinning

Mineral Turpentine

Coverage

Approximately 14 square metres per litre per coat.

Pack Size

250 mls, 500 mls, 1 litre and 4 litre

Revised January 2021
