

Product Manual

Model: STE-2H-STI2HEM

Dear customers:

Thank you for buying our new generation of **steam sauna cabin**.

For the purpose of helping you to better know and properly use this **steam sauna cabin**, please carefully read and properly keep this manual, which is applicable to the new generation of steam sauna cabin.

A. Introduction

A.1 Overview

Particular care was devoted to the health promotion, moral self-cultivation, conformity with nature, and mental tranquility in the ancient Chinese culture. Spirit refers to the mentation of human beings. Wet steaming will realize the mental tranquility of “harmony between man and nature”, and steam bath is an indispensable part of health promotion in the traditional Chinese culture. For this purpose, this steam sauna cabin produces a brand new world for steam sauna by virtue of integrating the modern technology with the ancient steam therapy.

C.2.4 DO NOT bring pets into the sauna cabin.

C.2.5 DO NOT use this product after overdrinking.

D. Tips

D.1 It is recommended to keep the temperature within the range of 60--75°C.

D.2 Sweating is generally started 15~20 minutes after using a sauna. It is recommended that every sauna shall be no longer than 30 minutes.

D.3 Open the vent hole during usage, to keep ventilation in the cabin.

D.4 Drink more water before and after the sauna, to replenish the body moisture.

D.5 Take a bath before using a sauna, to facilitate the perspiration.

D.6 Apply some essential oil on your body, hair or other parts when using a sauna, to facilitate the skin absorption; and clean it after sauna.

D.7 Partial massage can be done when using a sauna, to more favorably alleviate pains.

D.8 Your skin will be very smooth after using a sauna.

D.9 It is recommended to use a sauna one hour after a meal or on an empty stomach.

DO NOT use a sauna immediately after strenuous exercise.

D.10 Increasing the frequency of sauna can help to improve the immunity and inhibit bacteria growth when catching a cold or flu.

D.11 Stay in the sauna cabin for a while after completing the sauna, to sufficiently perspire. Then take a hot bath and it is recommended to finally take a cold bath to cool down the whole body.

D.12 Please consult your doctor for other cautions.

E. Maintenance & Repair

E.1 Clean the box with wet cloth. DO NOT use gasoline, alcohol, benzene or any related chemical to clean the box.

E.2 Ultrasonic can be used to sterilize the sauna cabin in hospital or public places.

F. Transport & Storage of Instruments

F.1 Avoid rain, snow and violent collision during the transportation.

F.2 DO NOT store it in damp conditions.
