#### Charging

- Charge the earbuds: Place the earbuds into the charging case and close the cover. The red light will turn on and it will enter a charging state.
- Charging: When charging, the red indicator light of the charging case will flash. When the charging is completed, the red light indicator will stop flashing and stay on.

#### Check the battery

- Earbud power: After the earbud is connected to the mobile phone, you can check the earbud power in the status bar of the mobile phone.  
Note: The status bar of mobile phone only shows the power of two earphones, and some phones may not support this function
- Charging bin power: Put the earphone into the charging bin when the cover is closed
  - ① The red indicator light in the charging bay is on for about 10 seconds, indicating sufficient power;
  - ② The red indicator of the charging compartment blinks or does not turn red, and the green indicator is displayed when the cover is opened. It indicates that the power is low and needs to be charged in time.

#### The connection

- Connecting a new device

- ① Turn on the earphone and wait for the earphone to connect.
- ② Turn on the device Bluetooth, search for and connect the SonicVibes TWS.

- Connection interruption

When the device turns off the Bluetooth or exceeds the connection range, the earbud automatically enters the state of waiting for connection. If the earbud is not connected to any device within 5 minutes, the earbud automatically shuts down.

- Automatic connection back

When you open the charging case, the earbuds will automatically connect to the most recent connected Bluetooth device.

Tip: If the earbud cannot be automatically connected back to the device, manually connect the earbud to the device on the Bluetooth interface

#### Indicator light

1. When charging, the headphone indicator is steady on, and when fully charged, the indicator is off;
2. Turn on: The indicator blinks.
3. Power off: The indicator is on for 2 seconds.
4. Wait for pairing, red and blue lights flash.
6. The left and right earphones are paired successfully. The primary ear flashes red and blue alternately, and the secondary earbud is off.
7. The phone is successfully connected and the indicator is off.
8. Press the smart touch button to switch on and off the earbuds

#### Function key

1. Click Pause, answer the call, or hang up the call.
2. Press for 3 seconds: rejects the call.
3. Double click: the next song;
4. Three clicks: volume increase and decrease;
5. Hold down for 3 seconds to access SiRi

#### Preventive measure

1. Earbuds should be placed in the case and stored in a dry and ventilated environment. Avoid oil, water, moisture and dust as it will affect the products performance.
2. Avoid using harsh, organic solvents or materials containing these ingredients to clean the earbuds.
3. To ensure a smooth connection, it is recommended that the distance between the earbuds and the phone is within 10 meters.
4. If the earbuds cannot be connected or is improperly connected, please do not disassemble the earbuds or accessories by yourself.
5. Charging your case: Please use the included USB cable to charge the battery.
6. In order to ensure normal use, please ensure sufficient power supply for the case and earbuds.
7. Please use a 5V1A charging adapter (not included).
