

**B**ehind SIMPLY is actually a much more sophisticated object than its name suggests.

Made of folded metal, SIMPLY is a thin and light shelf that can be easily attached to any type of support. The modularity of the shelf lies in the magnetization of the different elements that make it up and allow all possible variations according to the desires or needs of each person.

The shelf can be placed in any room of the house to hold books, mail, make-up products, jewellery, keys, etc.

The designer has designed it in two versions: a set of four pieces or a set of three pieces with a mirror; and made it available in two colours: powdered white for the SIMPLY White or foggy light steel for the SIMPLY Foggy version.

Available in two versions and two colors.

blanc mat  
matte white

acier foggy light  
foggy light steel
