# INNOVATION CRAFTSMANSHIP FLEXIBILITY THE S.O.TECH WAY

Not only has SOTECH committed 15 years to a no knock-off policy, but SOTECH put its money where its mouth is. We have invested heavily in developing the industry's top development program with six dedicated prototype tailors in our Engineering office, a separate design studio staffed by four personnel, and a team of project managers and company representative/field designers who travel to meet with units in the field to design gear to their requirements.

As you can imagine, this is an expensive business model, and there are very few companies left in tactical nylon doing this. The most common model you will see involves companies that wait for the innovators to develop, test and field a new design. Then they go down to a store and buy a few products, send them to their factory (usually overseas), tell the factory to make a few changes (sometimes unfortunately, it's a direct copy), slap their label on it, and add it to their catalog. We understand the model - Their costs are lower, because they didn't have to pay for research and development. They often underbid the company that originally conceived of the design.

To help our customers understand who designed our products, we are now including "development assistance by" credit to those operators who helped us design these products along with the conception date.

# S.O.TECH PROUD SPONSOR OF:

Vets Corps USA, Parent organization to Green Vets LA is a S.O.TECH-sponsored non-profit organization designed to provide job training for both injured and non-injured veterans. This program offers a wide variety of job training aimed at helping veterans successfully re-enter the work force. Every purchase you make aids in this effort and helps another Veteran rejoin the society they once defended.

Several of the Veterans from this program aided in the manufacturing of many of the items in this catalog. Assembling systems for military and law enforcement programs is part of their recovery. These work therapy programs help Veterans feel part of "The Team" and help them combat depression, abandonment, and other common issues among our Nation's heroes.

- Fits under most plate carriers
- Carries both Plates and Soft Armor
- Lifetime Warranty
- Material: Pack Cloth
- Weight: 1.1 lb.
- Available sizes: S-XL
- Conception: 2010.

# BLOCS GEN 4

## BLOCS 4th Generation is Here!

S.O.TECH is proud to announce the next generation of BLOCS, code name FlexTab Lite (Gen. IV).

We are taking our original Patented Flex Tab technology and combining it with Hypalon, our original FlexTab which was introduced in 2008 is a hardware and Velcro free fastening system in which there were no buckles to break and no Velcro to rot. Now combined with Hypalon our FlexTab is now thinner and stronger than ever. We are proud to introduce our thinnest, lightest, and most robust line of gear, ever.

We at S.O.TECH pride ourselves in making the most modular gear available. Our new BG4 Chest Rig also directly integrates with our new Viper Belt. For those that require an extra ridged frame and added weight distribution for their chest rig we designed the Viper Belt to be fully compatible. To take it a step further, our Viper Belt is also compatible with armor inserts (sold separately)

We took our Patented internal magazine shingle design and revamped it. Our new BG4 Chest Rig will be made from 200D Theda Fabric, Hypalon backed and of course will feature our Patented FlexTab MOLLE system. It will also be set up for a total of 12 magazines in 2 x 3 configuration (left and right side). The internal shingles are retained by elastic and 1" webbing for pull tabs. Since the rig is backed with our FlexTab Lite, shoulder harness is removable and can be integrated into an armor carrier system. We also integrated a hydration carrier for those who need it. It's removable for those who don't. Weighing only 22 ounces (including the internal magazine shingles) makes this our lightest chest rig ever.

For the initial Launch we will be offering the following S.O.TECH classics:

# CHEST RIGS

Front

Rear

## M4 Internal Mag, Split Chest Harness (BM4IMSCH)

- Uses Fastex buckles to secure fit
- 6 Internal M4 mag slots

Front

### Included Items:

2 SOF-IMAP Pouches

2 SOF-IMAP Inserts

2 General Purpose Pouches

1 Hydration Harness

Rear

# FLEX TAB LITE

## INTRODUCING THE NEW FLEX TAB LITE!

We have now combined our patented Flex-Tab system with the ultralight weight material CSM, or Hypalon as it's known. It's lighter, thinner, and water and chemical resistant.

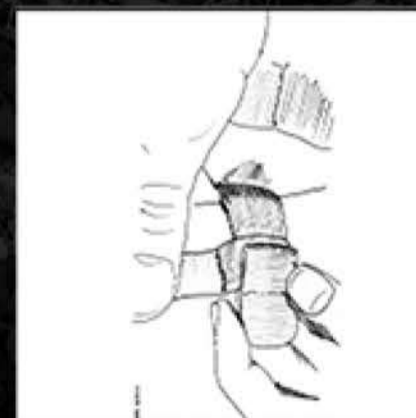

Flex-Tab uses only fabric attachment points, eliminating the need for plastic and metal parts that can warp or deteriorate over time. SOCOM and USASOC have adopted the Flex-Tab system and have been using it on official issue gear since 2005.

Combining the Flex-Tab system with Hypalon creates a lower profile and eliminates excess weight while increasing its overall strength.

Look for our new products through the catalog that feature the new Flex-Tab lite!

Flex-Tab has been wind tunnel tested at 600 knots per hour!

Weave Flex-Tab through MOLLE bar, then pouch, alternating till no more spaces can be woven. Pull the tab through the last bar on the pouch, securing it in place.

# POUCHES & ACCESSORIES

## **BLOCS Double Mag Pouch (BDMP)**

- Holds two 5.56 mags
- Rounds secured by Velcro flap
- Secures by 2 MOLLE on rear
- Lifetime Warranty
- Material: 500D Cordura

  - Lifetime Warranty
- Dimensions: 22 in. x 5.5 in. x 6 in. [Internal]  
Conception: 2006.

# PACKS & BAGS

## Mission Go Bag (MGB)

One of S.O.TECH's most popular items, the MGB, can easily be reconfigured as a shoulder bag — and with a fold and a snap it can be converted into a waist pack that rides below body armor. Stowing the shoulder straps in the rear pocket configures the bag as a briefcase utilizing stowable carrying handles or as a large vest pouch for front or back using the PALS/MOLLE compatible Flex-Tab™ attachment system (Patented). These tabs can also secure the bag to a larger pack. A contoured shoulder strap, padded back plate and sleek design with rounded edges provide the comfort required for long missions. Official issued item to all SOCOM forces including: Green Beret, Navy SEAL, Army Ranger, 160th SOAR, Air Force PJS, and USMC Special Ops.

The bag is equipped with a large zippered main compartment and a bellowed zippered front pocket. The main compartment has (4) large draw-corded pouches (designed to accommodate 500 mL IV bags), a flat panel pouch, and a One-Wrap tape dispenser. Conception: 2005 . US Patented  
NSN: 8465-01-557-1565

## Go Bag Mini (GBM-MC)

The S.O.TECH Go Bag Mini is a hybrid of the MGB and the SGB. Features include:

- Sling carry configuration
- Waist carry configuration
- 2 Rows of MOLLE across front
- A zippered side pocket
- Large main compartment
- MOLLE on strap
- Material: 1000D Cordura Nylon
- Lifetime Warranty
- Conception: 2006.

## Expanding SERE Pack (ESP)

- Cuts down on bulkiness of overall items
- Use as a pouch when stowed
- Use as back up pack during SERE operations
- Uses 4 MOLLE spaces to attach
- Quiet zipper pulls
- Heavy duty webbing for straps
- Material: 200D Theda Fabric (Multicam only)  
Pack Cloth all other colors
- Dimensions: Length x Width x Depth  
7 in. x 4.5 in. x 6 in. [Stowed]  
13 in. x 5.5 in. x 17 in. [Expanded]
- Conception: 2001. US Patented

# PACKS & BAGS

- Dimensions: 19" x 12" x 4"
- Conception: 2010

# MISSION SYSTEM PANELS

## Mission System Panels

S.O.TECH has developed a line of inserts that drop into our Mission Packs to help you keep organized. The Expedition, the Trek, and the Urban can all accept these Mission System Panels. Each panel is different and designed with a purpose in mind but can be used for anything you see fit. These Panels open up into a hanging configuration and fold up to slip easily into our Mission Packs. These are some of the many products that showcase S.O.TECH's modularity in design.

Folded

Stuffed inside the pack

When fully loaded the Mission System Panel will fill up most of the main compartment of S.O.TECH's Mission Packs.

Opened

# MISSION SYSTEM PANELS
