INNOVATION CRAFTSMANSHIP FLEXIBILITY THE S.O.TECH WAY

WHY S.O.TECH ?

Why is S.O.TECH the leader in design, innovation, and craftsmanship?

Not only has S.O.TECH committed 18 years to a no knock-off policy, but S.O.TECH put its money where its mouth is. We have invested heavily in developing the industry's top development program with six dedicated prototype tailors in our Engineering office, a separate design studio staffed by four personnel, and a team of project managers and company representative/field designers who travel to meet with units in the field to design gear to their requirements.

As you can imagine, this is an expensive business model, and there are very few companies left in tactical nylon doing this. The most common model you will see involves companies that wait for the innovators to develop, test and field a new design, then go down to a store and buy a few products, send them to their factory (usually overseas), tell the factory to make a few changes (sometimes unfortunately, it's a direct copy), slap their label on it, and add it to their catalog. We understand the model - Their costs are lower, because they didn't have to pay for research and development. They often underbid the company that originally conceived of the design.

But we are S.O.TECH, we do things differently because we are different. Our quality speaks for itself and we back our products with a lifetime warranty. Our product was literally designed and built to survive the world's worst.

S.O.TECH TACTICAL

We love a challenge. The features on each piece of gear are drawn directly from a mission requirement. Many of the world's most elite military and law enforcement operators and gear users have brought their tactical challenges to S.O.Tech's veteran designers for over 17 years. These operators don't just demand durable bags, they require zippers secured for airborne ops, pockets accessible during surveillance, and low profile for bail out during ambush and burning vehicle scenarios. Every aspect of our design is considered for the tactical situation.

These bags mean more than tough gear on the battlefield, they have been our contribution to the defense of freedom, and support to those standing the line against criminals and terrorists who would do us harm. Rough men who stand watch in the dark of night do so because they possess a quality – this quality is reflected in the gear they choose to do a job that few others can do.

Sincerely,
Jim Cragg

President / Owner
S.O.TECH

Take Note:

1. All products can be modified to meet your unit's requirements.
2. S.O.Tech can provide pre-stocked kits through our suppliers based on unit requests.
3. Products listed and prices change constantly to reflect recommended improvements. Please confirm prices and designs with S.O.Tech directly prior to ordering.
4. Listed prices are Manufacturer Suggested Retail Price (List). Contact S.O.TECH for government quantity-based prices, mass quantity pricing, and bids.
5. Products are available through official supply channels (DAPA, NSN, GSA, and IMPAC Cards). Contact S.O.Tech for assistance.
6. All products come with S.O.TECH's life time guarantee. If you experience a problem with your gear (manufacturer's defects only), send it back to us and we'll repair or replace it free of charge.
7. For cancellations of "built-to-order" items, there will be a 20% restocking fee.

S.O.TECH PROUD SPONSOR OF:

Vets Corps USA, Parent organization to GreenVetsLA is a S.O.TECH-sponsored non-profit organization designed to provide job training for both injured and non-injured veterans. This program offers a wide variety of job training aimed at helping veterans successfully re-enter the work force. Every purchase you make aids in this effort and helps another Veteran rejoin the society they once defended.

Several of the Veterans from this program aided in the manufacturing of many of the items in this catalog. Assembling systems for military and law enforcement programs is part of their recovery. These work therapy programs help Veterans feel part of "The Team" and help them combat depression, abandonment, and other common issues among our Nation's heroes.

- Lifetime Warranty
- Material: Webbing & Polymer
- Weight: 0.3 lb.
- Conception: 2013.

S.O.TECH VESTS & BODY ARMOR

CRAFTSMANSHIP

The Origin of The COBRA ASSAULT ARMOR CARRIER

LAPD SIS pioneers mobile apprehension and develops new armor system with S.O.Tech

S.O.Tech's design staff is honored to develop an armor carrier for a progressive approach to law enforcement suspect apprehension program being pioneered and perfected by LAPD's renowned Special Investigation Section SIS. The soft and hard armor carrier and specified pouches and go bags are part of a system designed to allow a plain-clothes officer in mobile surveillance mode to rapidly don his/her tactical gear, dismount the vehicle, chase down, and apprehend the suspected criminal. The game changer here is that the entire ensemble is designed around mobility. The system is not only designed for rapid donning in the tight confines of a surveillance vehicle, but the vest is designed for mobility and dexterity during confrontations. The days of the raid jacket are over as the modern urban environment requires up to ceramic plate rifle round protection. Conventional law enforcement procedures saw a detective in a jacket approach a suspect, now replaced by a bulky protective vest. The only other option was a heavily armored and encumbered SWAT team that could apprehend an armed suspect after that suspect was cornered in a static location where SWAT could set up a perimeter. SIS developed and perfected tactics to break out of that box, allowing for the tracking and apprehending of suspects on the move. S.O.Tech designers spent months working with members of the elite LAPD unit, customizing the rigs around their deployment of weapons, auto glass breachers, distraction devices, bandoleers and other tools in well-choreographed foot and vehicle take-downs. For the past 15 years, we at S.O.Tech have been lucky to be in Los Angeles working with LAPD SIS. They have a well-deserved world-wide reputation for surveillance and tactics. It's been an amazing experience working with them as they identified such a significant tactical gap, developed radical-thinking tactics, and then perfected them to the standard of a major metropolitan department such as LAPD. Numerous Los Angeles area departments are already looking at adopting these TTPs and we expect to see detective bureaus and narcotics divisions world-wide adapt to the program. As professionals, S.O.Tech won't discuss the intricacies of the tactics, but we will assist law enforcement professionals who have

Dev Asst. Dean Gizzi

VIPER VEST-MACTAC

VV-MACTAC

A slimmed down and minimized Law Enforcement version of our popular military VIPER Vest. Specifically designed for MACTAC response situations and Counter Terrorism direct action.

Ultra lightweight, low profile, and modular plate carrier vest with 3 front internal mag pouches. Made out of 500 Denier Cordura® and strategically designed for protection, utility and mobility without the weight.

Front

Rear

PYTHON - SOFT ARMOR & PLATE CARRIER

VSAC

An ultra-light weight, low profile soft armor carrier designed for the utmost comfort and reliability. Front and back pockets accept military size ceramic plates. It's design lets it sit comfortably under most chest rigs, under a blouse, or a jacket. Elastic quick-on cumberbund enhances quick donning. Conception 2010.

S.O.TECH VESTS & BODY ARMOR

VIPER VEST, RELEASEABLE

VVR

Key Features:

- Quick Release System allows for quick removal
 - Holds standard SAPI plate sizes
- SAPI Plate Sizes:
- Small - 222 x 298 mm (8¾ x 11¾ in)
 - Medium - 241 x 318 mm (9½ x 12½ in)
 - Large - 260 x 337 mm (10⅛ x 13¼ in)
 - Extra Large 280 x 356 mm (11 x 14 in)
- 5 Rows of PALS webbing on front
 - 6 Rows of PALS webbing on rear
 - 3 Internal magazine pouches with bungee retention
 - Holds a variety of magazines (M4, M14, SCAR-H, and AK-47)
 - Built in back accessory pouch (ideal for Garmin GPS units or other small electronics)
 - Side routing to minimize wire snag hazards
 - Top-opening can be secured open
 - Flat map pocket hidden under front admin pouch
 - Removable routing sleeves and shoulder pads included
 - Routing sleeves can conceal hydration tubes, communications cabling, and comm wires
 - Routing sleeves can route wires to built in hydration bladder pocket
 - Side and shoulder straps are sewn webbing to webbing. As opposed to webbing to Cordura®. This increases frame strength of the vest
 - 1.5 inch side buckles can be adjusted to sit in front, middle, or rear of torso, based on operator preference
 - No obstruction to shoulder weapon
 - Side pouches can be customized to the end users preference.
 - Side pouches lock into place via S.O.TECH's HVAS attachment system (Patent Pending)
 - Material: 1000D & 500D Cordura® Nylon, Heavy webbing, and polymer
 - Lifetime Warranty
 - Made in the USA

13" x 5" x 3.5" (large left and right side pockets)

S.O.TECH Go Sling Bag (SGSB)

The S.O.TECH Go Sling Bag is covered with MOLLE for maximum modular customization by the operator. 4 side slash pockets for smaller items. All Go Bags come with a Velcro lined interior.
Dimensions: 22" x 5.5" x 6" (main compartment)
Conception 2006.

MISSION GO BAG-A1

MGBA1

The S.O.TECH Mission Go Bag-A1 is ideal as a patrolman's seat bag or an active shooter response bag. This bag can be carried 12 different ways, such as a satchel, waist pack, vest mount, etc. It's been used as a riot gas bag, EOD bag, evidence bag, briefcase bag, sniper bag, camera bag and breacher bag. It was originally designed as a medical equipment go bag. It's currently an official issue to every member of SOCOM as a survival go bag. Conception 2005. US Patented

Key Features:

- Over 12 different carry configurations
- Shoulder strap included
- Stowable strap for clean professional look
- 2 rows of MOLLE across front
- Compression straps
- Front Velcro for morale patch
- 2 compartments
- 4 large interior pockets
- Material: 500D Cordura® Nylon
- Dimensions: 12.5" x 14" x 3"
- 1.4lbs
- Lifetime Warranty
- Made in the USA

Carry handle has sewn in flap to prevent chafing when using brief case carry configuration.

INNER COMPARTMENT

The inside consist of four pouches and one internal flat bandage pouch. The 4 pouches are large enough to hold a 500mL IV bag. Rear slash pocket ideal for personal tablet.

S.O.TECH HOME OF THE GO BAG

INNOVATION

MISSION MESSENGER GO BAG

MMGB

The S.O.TECH Mission Messenger Go Bag is a versatile bag ideal for organization. Based on the original MGB, this bag has a built-in computer compartment that accepts most laptops up to 15" wide. 3 large internal bag slots are great for storage and to help keep bag organized. Switching buckles allows bag to be worn horizontally on back as a bicycle messenger bag. Stowing the shoulder straps into the rear pocket configures the bag into a briefcase.

Dimensions: Length x Width x Depth
17" x 12.5" x 4"

Conception 2006. US Patented

INNER COMPARTMENT

X-Large:	39" - 43"
XX-Large:	44" - 47"
XXX-Large:	48" - 50"

S.O.TECH FLASH BACK!

The original quick disconnect riggers belt was designed and manufactured in 1998 using the Austrianpin "Click Lock" buckle (a predecessor to their Cobra Buckle) created for use on hang gliders. It seemed like a good idea at the time. We provided it to numerous special operations units, then moved onto other projects and the design fell into the storage unit of S.O.TECH, hidden away. Now 16 years later the Cobra buckle has become an industry standard. In honor of our original design we are re-releasing our cobra belts which will be available in both aluminum and polymer Astrialpin buckles!

Riggers Belt, Cobra Quick Disconnect

RGB-QD

- Uses AustriAlpin Quick Disconnect Cobra Buckle
- Constructed using type 13 webbing
- MS22040 Forged Steel V Ring
- Sewn with parachute weight thread to a 7,000 lb breaking strength
- Lifetime Warranty
- Made in the USA

Conception 2010.

BLOCS CONTOURED PADDED PISTOL BELT

BCPPB

- Web belt is sewn directly to 3/8" closed cell foam belt pad for increased load bearing efficiency and lumbar support. PALS webbing surrounds outside of pad for additional pouch attachments.
- Used for added support and stability when used in conjunction with the Mission Pack (MP) or Mission Go Bag (MGB).
Conception 2010.

Velcro Backed

THE SHOTGUN SHELL TRAY 5 SST- 5

The SST-5 keeps those big clunkers ordered and ready to load. They can be used to organize specialty ammo or be set up for rapid reloading. The SST comes in five and six round trays (see SST-6) and is sold in pairs.

Conception 1997.
Dev Asst. DA Frank LaFlamme

THE SHOTGUN SHELL TRAY 6 SST- 6

SST- 6

The SST-6 is another addition to the accessory line. Similar to the SST-5, it carries an extra round. The Velcro back lets you adhere it to several different applications such as the Shotgun Butt Rig, the Rapid Response Bandolier, and several other items.

Conception 1997.

RAPID RESPONSE BANDOLIER

Velcro lined can carry a 10 round shotgun shell tray

MBANRR

When time is a factor and a fire fight is imminent, strap on 120 extra rounds of ammunition with grab-and-go speed until back-up arrives.

Each individual pouch measures 9.5" L x 3.5"W. Entire bandolier fits 8 x (30 round) .223 mags. 4 x (20 rounds) .308 mags, or 8 x (6 round) shotgun shell trays. Inside compartment lined with Velcro loop. Two separate pouches each side with ambidextrous zippered access. Bandolier can be worn cross body on either left/right sides. With a tug, rear pouches cycle forward in one fluid movement to provide fast access to rear pouch ammunition when front pouch ammo is expended.

Conception 2011.
Dev Asst. Dean Gizzi

- 2 Elastic loops on bottom for chemlights
- Low profile
- Material 1000D Cordura® Nylon
- Lifetime Warranty
- Made in the USA

THE SHOTGUN BUTT RIG SBR

The Shotgun Butt Rig is a VELCRO®-coated plate secured to the shotgun butt with sturdy nylon cross and butt straps for a secure fit. The ammunition tray can be removed and replaced with additional loaded trays. This creates an ability to carry dedicated trays of specialty rounds (such as door busters and slugs). Conception 1997.
Dev Asst. Frank LaFlamme

THE SHOTGUN BUTT RIG WITH PADDED CHEEK REST SBR-PC

Foam plate added to our already popular SBR. The SBR-PC allows for increased comfort during aiming and firing. We use closed cell, 1/4" foam for the padded portion of the rig. Padded portions of the rig are the cheek area and internally on the bullet tray area. There is no padding on the rear of the rig. There is only the rear webbing strap used for rear adjustment and rig stability on the weapon. Conception 2000.
Dev. Asst. Frank LaFlamme

HANDCUFF POUCH
