Shown with ZAK Clip

SOFT-W Tourniquet

Sharpie®

Hemostatic Agent

\*Not shown: Casualty Card, Nasal Airway Tube, Surgical Tape

# Patrol Tourniquet Pouch

PTQP

Can slip over Belt Hanger & clip into IFAK

Designed to carry a SOFTT-W® 1.5" Tourniquet.  
Can be worn stand alone, vertically or horizontally on a duty belt.  
Can also be worn in conjunction with our Belt Hanger Adapter  
which integrates into the Speed Clip Patrol IFAK thigh rig system.

PIFAK-M

Both the Patrol IFAK and Patrol Tourniquet Pouch are available in stand alone Flex Tab MOLLE configuration which is the preferred choice of LASD SEB/SWAT.

## WHY SPEED CLIP?

The patrol officer needs to be agile and light, and look public-friendly. But when situation dictates and he/she needs a taser, an IFAK or rifle magazines, just speed clip it on. These are functionally designed, durable, comfortable and professional looking.

## ESCALATION: DUTY GEAR to SPEED CLIP to SUIT-UP

Duty gear is constant wear. Speed clip is for quick need in rapidly developing situations. Suit-up gear is for instances where time is available to don riot control vests or tactical assault vests.

Every operation and every officer are different, and they shift from team to team and mission to mission frequently. We designed the mounting system where one ambidextrous pouch can easily be mounted thigh, belt or vest.

## HOW IT WORKS

To mount onto a belt, unweave the double Velcro straps, pull them over the belt, then weave back through the securing loop which forms a belt loop. Straps can be extended and secured by vertical wrap to form a short drop. To wear as a drop leg, slide on a belt hanger adapter buckle (or other attachment system) and close the straps over and through the securing loops. Keep in mind the strap goes under the lower loop of the Velcro straps. To mount to the vest, weave the double Velcro straps through the webbing on the vest and the securing loops on the back of the vest.

## BELT OPTIONS

Belt attachments include a 2 inch side lock hanger that mounts to an under belt, a 1 inch Zak clip that mounts over a duty belt or a narrower version that mounts on a plain clothes belt. The Zak clip attaches to the built in D-ring, or a larger slide on D-ring, including the 212 Gear flat D-ring.

## LOAD OPTIONS

Standard pouch options include a taser holster, IFAK, radio pouch, double rifle magazine pouch, 60 round Surefire magazine pouch and a MK9 pepper dispenser pouch. Also available are a 4 mag and medical IFAK combination pouch, gas mask pouches, shotgun pouches, a detective array rig, and riot control thigh rigs.

## HISTORY AND INFLUENCE

Original Speed Clip Designs Circa 1997

The Speed Clip was developed with Deputy Frank LaFlamme as one of SOTech's first projects. The experiences of the B of A Shootout in North Hollywood in 1998 where officers had left their spare ammunition in boxes in their trunks saw an immediate demand for Speed Clip Ammo Rigs. Shortly afterward, SOTech began mounting Taser holsters and other rigs to this platform watching the design evolve into its current state.

LAPD AND LASD, two of the world's most progressive law enforcement agencies have come together to SOTech's design table to work with our Speed Clip concept to develop an answer to their tactical requirements. Both agencies have tested and adopted the Speed Clip mounting system in purchases of thousands of Taser, IFAK and magazine rigs. Contact SOTech to be put in touch with LAPD and LASD POCs for additional information.
