INTRODUCING

A NEW WAY FOR A BETTER DAY

ladykind

Our Mission

Bringing Taboo Topics to the Table

Our mission is to eliminate the secrecy and shame around menstruation and menopause by reframing it as a powerful, sacred and normal topic of conversation

Is CBD the real deal or really just hype?

It's on the news, in your feed, on your group chat. We'll cut through the clutter and straight to the science.

What is CBD?

Second only to THC - the cannabinoid that gets you "high" - CBD is the most prevalent chemical compound (out of 100+) found in the hemp plant. CBD works with your body to deliver a range of benefits naturally and effectively.

Why We Use Broad Spectrum CBD

To put it simply, you get the best of both worlds: the extra benefits of multi cannabinoids, without the unwanted THC "high" or other intoxicating effects.

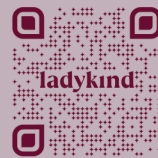

Why We Don't Use THC

The relief you want comes from the highest quality formulas - free from any unwanted extras. Since getting high isn't the goal, we meticulously extract the THC from the raw oil. Then we take it a step further, using an unrivaled refinement process to remove any pesticides, solvents, residuals or other impurities. The result? The cleanest, purest, most effective hemp extract possible, no THC necessary.

Trace Your CBD

We Believe in Full Transparency. Our products are third party tested for purity and efficacy. Review the certificate of analysis for all Ladykind products here.
