

Quick Setup

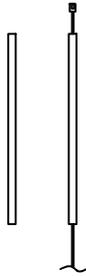

Contents

Complete Setup

1 x Body

2 x Legs

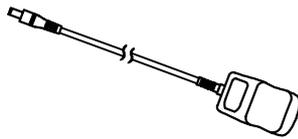

6 x Screws

1 x Touch Remote

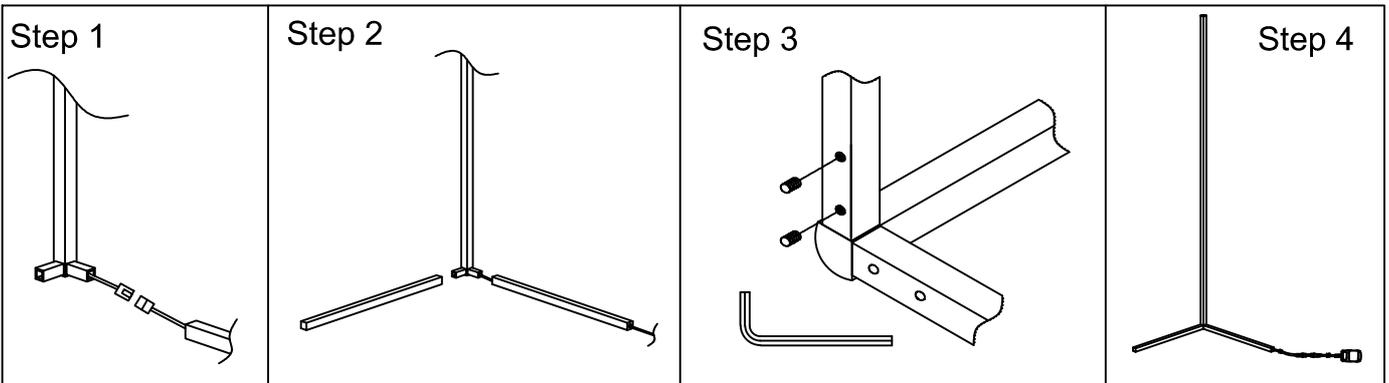

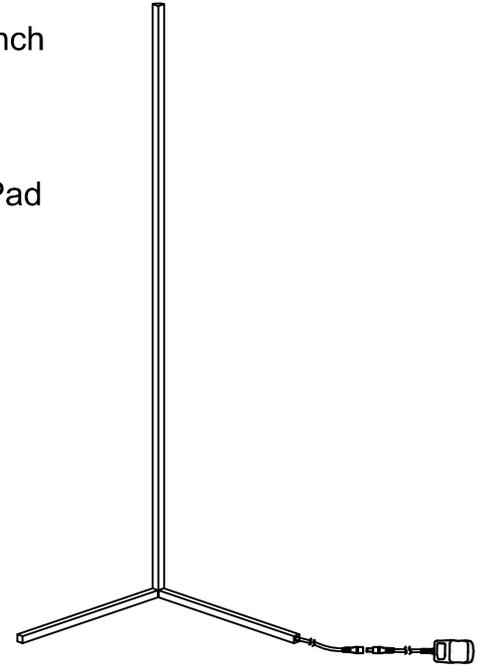

1 x Power Adaptor

1 x Allen Wrench

3 x Foam Pad

- ① Remove the protection material from the packing box. Connect the wire coming from the leg to the wire coming from the body as Step 1.
- ② Slide both legs onto the lamp body as shown in Step 2. Pull the power cable wire gently to be tightly to make the leg to attach to the lamp body if needed.
- ③ Use the Allen Wrench to fix the screws to the holes on the bottom of the legs as Step 3. Tighten screws once all screws are in the place to secure lamp from falling down.
- ④ Connect the power wire of the adaptor with the wire in the leg. Select a suitable socket and install it to the adaptor if needed. Finally put 2 pcs of AAA battery inside of the remote.

Thank you & enjoy an amazing light show with Niko Corner Floor Lamp!

Caution:

1. Be careful when you remove the wrapped protection covering material, please use your hand to remove it, please don't use the knife or scissors or other sharp tools to cut, because the power cable cord was covered and wrapped inside, and it will be cut by yourself unintentionally.
2. Do not use the power supply beyond the specification range(100-240V/ac,50/60Hz). Avoid scratching the surface when installing the lamp.
3. Not intended for outdoor use. Use only soft cloth or tissue to clean, no chemicals or liquid objects should be closed to the lamp.
