

# Pore Perfect Peel

## Professional Treatment Protocol

The Pore Perfect Peel features salicylic acid, a medium strength 30% lipophilic BHA acid. It dissolves the sebum in the skin that can lead to breakouts. Salicylic's unique ability to penetrate the hair follicle allows it to clear pores at a deeper level. It is known to have anti-inflammatory and anti-microbial properties, making it the clear choice for improving blemish and breakout prone skin. Pentavitin adds moisture to keep skin hydrated and balanced. The Pore Perfect Peel will reduce breakouts and oily skin, refine skin texture, calm irritation and keep skin hydrated.
