

Sensitive Precision Peel®

Professional Treatment Protocol

This highly effective and non-irritating treatment incorporates lactic acid and soothing Kaolin with aloe for enhanced rejuvenation that can be used independently or prior to microdermabrasion. Precision Peel exfoliates the irregular dead skin cells, promotes cell renewal, stimulates circulation, and promotes the growth of healthy, plump new cells. It will minimize the appearance of fine lines, scars, acne and environmental damage. Lightens pigmentation and evens skin tones. This combination will provide measurable results for almost any skin type.
