

# ageless CBD™ facial

## Professional Treatment Protocol

The CBD Facial Treatment features cannabidiol (CBD), a phyto-cannabinoid found in hemp plants. CBD offers vitamins, minerals and antioxidants with a plethora of skin benefits. Our skin has cannabinoid receptors, which allow for excellent penetration and therefore increased effectiveness without requiring processing by the liver. When applied directly to the skin, it offers targeted relief for many who suffer from inflammatory skin conditions. The CBD Facial Treatment enhances skin's radiance and hydration in addition to helping reduce inflammation.
