

# Magic Disc

*Specially developed  
**DIAMOND** abrasive  
discs for very hard OEM  
E-coat primers and  
matte clear coat sanding*

The Super-Tack film backing Magic Disc utilizes top quality diamond abrasive grains and an advanced anti-clogging technology, providing an extremely long sanding life. With its high performance cutting speed, Magic Disc is ideal for sanding on all types of very hard coating surfaces while still maintaining its uniform finish.

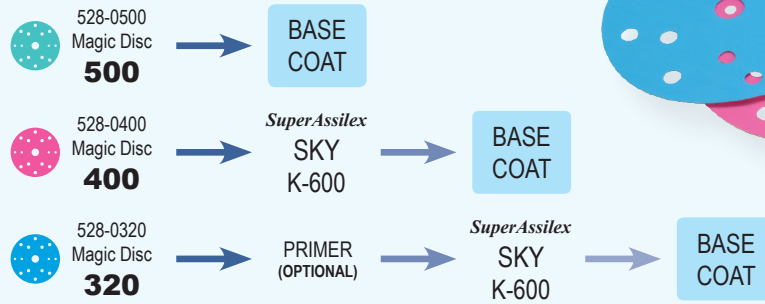

**SUPER-TACK** = Hook & Loop

#### Which Magic Disc to use?

The uniformity of Magic Disc combined with diamond abrasive grains means using Magic Disc 500 can go straight to base coat application. For reduced total sanding time, use Magic Disc 320 to "cut open" the hard layer and finish sanding with regular abrasives.

#### Deciding Factor

- Total processing time
- Total number of steps
