JackJaw® 201
29" Tall, 19lbs
Pulls Wide, Flat Stakes
Quickly & Easily

"The best stake puller I have ever used."

Jeff Miller
M&M Construction
Brookville, Ohio

Faster & Easier Pulling! • No Bent Stakes! • Eliminates Broken Concrete! • Prevents Back Injuries! • Quick Payback!

"Our customers love the JackJaw's tough design and functionality. Once they see it work, they buy it. Their payback is very quick."

Terry Brown
American Rental
Odessa, Texas

The JackJaw® Advantage

JackJaw® stake extractors pull stakes straight up out of the ground without bending them or breaking the fresh concrete, even when the stake is flush with the top of the form. A 50lb push on the handle generates a massive 1050 lbs of gripping force and a 450lb upward breakout force on the stake. This tremendous leverage prevents operator back injuries. JackJaw® provides powerful, precise stake pulling.

Made to Last

JackJaw® stake extractors are produced in Dayton, Ohio from heavy gauge steel plate and tubing to withstand everyday job site use. The easily replaceable jaws are case hardened AR400 steel for long wear. No paint to chip. JackJaw® units have a zinc and clear chromate plating for long lasting durability and corrosion resistance.

Where to Buy
