

Step 1:

Lay the oval part of the birdbath on the ground:

Step 2:

Put the arms into the pointed brackets on Oval:

Step 3:

Put the black bracket around the longer end of the arms. Best advise think of it like a ponytail put them together in your hands.

Put the bracket over the arms. Please note it may not line up but that is ok. It will still fit

Step 4:

Put the bottom legs inside the brackets. The rubber stopped should be on the top where you can look at it.

Step 5:

You will flip the bird bath around, so the oval is now facing you. Once you have done that you will adjust the legs, so they are even on the ground. Once you have the legs even you will then take a screwdriver and tighten the bolts.
