

## Taco Tuesday Safety Data Sheet

### 1 Identification

**GHS Product Identifier**

Taco Tuesday

**Other means of identification**

Fragrance oil

**Recommended use of the chemical and restriction on use**

For manufacturing use only.

**Supplier's details**

Little Bee Scents

PO Box 684, Leavenworth, KS 66048

marsha@littlebeescents.com

**Emergency phone number**

Poison control: (800) 222-1222

In case of emergency, call 911.

### 2 Hazard(s) identification

**Classification of the substance or mixture**

While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.

**GHS label elements**

Warning

**Hazard statements:**

Eye Irrit. 2A: H319 - Warning

Skin Irrit. 2: H315; Skin Sens. 1B: H317 - Warning

**Precautionary statements:**

None

**Substances that contribute to the classification**

None

**Other hazards which do not result in classification**

Not applicable

**3 Composition/information on ingredients**

Description	CAS Number	EINECS Number	%
Methyl 2-naphthyl ether	93-04-9		1-<2.5%
1,3,4,6,7,8a-hexahydro-1,1,5,5-tetramethyl-2h-2,4a-methanonaphthalen-8(5h)-one	23787-90-8		<1%

**4 First-aid measures****Description of necessary first-aid measures****By inhalation:**

This product does not contain substances classified as hazardous for inhalation, however, in case of symptoms of intoxication remove the person affected from the exposure area and provide with fresh air. Seek medical attention if the symptoms get worse or persist.

**By skin contact:**

This product is not classified as hazardous when in contact with the skin. However, in case of skin contact it is recommended to remove contaminated clothes and shoes, rinse the skin or shower the person affected if necessary thoroughly with cold water and neutral soap. In case of serious reaction consult a doctor.

**By eye contact:**

Rinse eyes thoroughly with water for at least 15 minutes. If the injured person uses contact lenses, these should be removed unless they are stuck to the eyes, as this could cause further damage. In all cases, after cleaning, a doctor should be consulted as quickly as possible with the SDS of the product.

**By ingestion/aspiration:**

Do not induce vomiting, but if it does happen keep the head down to avoid aspiration. Keep the person affected at rest. Rinse out the mouth and throat, as they may have been affected during ingestion.

**Most important symptoms/effects, acute and delayed**

Acute and delayed effects are indicated in sections 2 and 11.

**Indication of immediate medical attention and special treatment needed, if necessary**

Non-applicable

**5 Fire-fighting measures****Suitable extinguishing media**

Product is non-flammable under normal conditions of storage, handling and use. In the case of combustion as a result of improper handling, storage or use preferably use polyvalent powder extinguishers (ABC powder), in accordance with the Regulation on fire protection systems.

**Specific hazards arising from the chemical**

As a result of combustion or thermal decomposition reactive sub-products are created that become highly toxic and, consequently, can present a serious health risk.

**Special protective actions for fire-fighters**

Depending on the magnitude of the fire it may be necessary to use full protective clothing and individual respiratory equipment. Minimum emergency facilities and equipment should be available (fire blankets, portable first aid kit,...)

**Additional provisions:**

As in any fire, prevent human exposure to fire, smoke, fumes or products of combustion. Only properly trained personnel should be involved in firefighting. Evacuate nonessential personnel from the fire area. Destroy any source of ignition. In case of fire, refrigerate the storage containers and tanks for products susceptible to inflammation. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

## 6 Accidental release measures

### Personal precautions, protective equipment and emergency procedures

For non-emergency personnel:

Isolate leaks provided that there is no additional risk for the people performing this task. Personal protection equipment must be used against potential contact with the spilt product (See section 8). Evacuate the area and keep out those who do not have protection.

For emergency responders:

Wear protective equipment. Keep unprotected persons away. See section 8.

### Environmental precautions

This product is not classified as hazardous to the environment. Keep product away from drains, surface and underground water.

### Methods and materials for containment and cleaning up

For accidental releases in excess of reportable quantities (RQ) (Table 302.4), refer to 40 CFR 302 for detailed instructions concerning reporting requirements and notify the National Response Center (800) 424-8802.

Absorb the spillage using sand or inert absorbent and move it to a safe place. Do not absorb in sawdust or other combustible absorbents. For any concern related to disposal consult section 13.

## 7 Handling and storage

### Precautions for safe handling

**General precautions for safe use:**

Comply with the current legislation concerning the prevention of industrial risks with regards manually handling weights. Maintain order, cleanliness and dispose of using safe methods (section 6).

**Technical recommendations for the prevention of fires and explosions.**

Product is non-flammable under normal conditions of storage, manipulation and use. It is recommended to transfer at slow speeds to avoid the generation of electrostatic charges that can affect flammable products. Consult section 10 for information on conditions and materials that should be avoided.

**Technical recommendations on general occupational hygiene**

Do not eat or drink during the process, washing hands afterwards with suitable cleaning products.

Technical recommendations to prevent environmental risks  
It is recommended to have absorbent material available at close proximity to the product  
(See subsection 6.3)

#### **Conditions for safe storage, including any incompatibilities**

Technical measures for storage: Maximum time: 12 Months  
General conditions for storage:  
Avoid sources of heat, radiation, static electricity and contact with food.

## **8 Exposure controls/personal protection**

### **Control parameters**

There are no applicable occupational exposure limits for the substance contained in the product.

### **Appropriate engineering controls**

Individual protection measures, such as personal protective equipment  
Always provide effective general and, when necessary, local exhaust ventilation to maintain the ambient workplace atmosphere below the exposure limits.

Respiratory protection: filter mask for gases and vapors  
Specific protection for the hands: protective gloves against minor risks  
Eye and face protection: safety glasses against splash/projections  
Bodily protection: work clothing and anti-slip work shoes

Environmental exposure controls:  
In accordance with the community legislation for the protection of the environment it is recommended to avoid environmental spillage of both the products and its container.

## **9 Physical and chemical properties**

### **Physical and chemical properties**

Appearance: Translucent Yellow liquid  
Odor: characteristic aroma  
pH: N/A  
Melting Point: N/A  
Boiling Point/range: N/A  
Evaporation Rate: N/A  
Partition Coefficient: N/A  
Decomposition Temperature: N/A  
Upper/Lower Flammability Limits: N/A  
Vapor Pressure: Not Determined  
Vapor Density: N/A  
Relative Density +/- 0.020: N/A  
Solubility: Not soluble in water  
Flash Point: 310F  
Flammability: N/A  
Auto-Ignition Temperature: N/A  
Viscosity: N/A

## 10 Stability and reactivity

### Reactivity

No hazardous reactions are expected because the product is stable under recommended storage conditions.

### Chemical stability

Chemically stable under the indicated conditions of storage, handling and use.

### Possibility of hazardous reactions

Under the specified conditions, hazardous reactions that lead to excessive temperatures or pressure are not expected.

### Conditions to avoid

Applicable to handling and storage at room temperature: not applicable

Increase in temperature: not applicable

Sunlight: not applicable

### Incompatible materials

Avoid strong acids

Avoid alkalis or strong bases

Oxidising materials: not applicable

### Hazardous decomposition products

Depending on the decomposition conditions, complex mixtures of chemical substances can be released: carbon dioxide, carbon monoxide and other organic compounds.

## 11 Toxicological information

### Toxicological (health effects)

The experimental information related to the toxicological properties of the product itself is not available.

### Other information

In case of exposure that is repetitive, prolonged or at concentrations higher than recommended by the occupational exposure limits, it may result in adverse effects on health depending on the means of exposure:

#### Ingestion (acute effect:

Acute toxicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for consumption.

Corrosivity/Irritability: Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect.

#### Inhalation (acute effect:

Acute toxicity: based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for inhalation.

Corrosivity/Irritability: based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect.

#### Contact with the skin and eyes (acute effect):

Contact with the skin: Based on available data, the classification criteria are not met. However, it contains substances classified as hazardous for skin contact.

Contact with the eyes: based on available data, the classification criteria are not met, however, it contains substances classified as hazardous for this effect.

CMR effects (carcinogenicity, mutagenicity and toxicity to reproduction):

Carcinogenicity: based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect.

IARC: ethanol (1); Benzyl acetate (3)

Mutagenicity: based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect.

Reproductive toxicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect.

Sensitizing effects:

Respiratory: based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect.

Skin: Based on available data, the classification criteria are not met, however, it contains substances classified as dangerous with sensitising effects.

Specific target organ toxicity (STOT) - single exposure:

based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect.

Specific target organ toxicity (STOT) - repeated exposure:

Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect.

Skin: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect.

Aspiration hazard:

based on available data, the classification criteria are not met, however it does contain substances classified as hazardous for this effect.

## 12 Ecological information

### Toxicity

The experimental information related to the eco-toxicological properties of the product itself is not available.

## 13 Disposal considerations

### Disposal methods

Dispose of in accordance with federal, state, and local regulations.

## 14 Transport information

**This product is not regulated for transport.**

## 15 Regulatory information

### Safety, health and environmental regulations specific for the product in question

The following components are listed on the OEHHA California Proposition 65 List as "chemicals known to the state to cause cancer" or "to cause reproductive toxicity":

None

It is recommended to use the information included in this safety data sheet as data used in a risk evaluation of the local circumstances in order to establish the necessary risk prevention measures for the manipulation, use, storage and disposal of this product.

Take into consideration other applicable federal, state and local laws and local regulations.

## 16 Other information

### Other information

The data contained in this Safety Data Sheet is accurate to the best knowledge of Little Bee Scents, applies to the product as supplied by Little Bee Scents and does not relate to use in combination with any other material or in any process. Data and information is furnished without warranty expressed or implied, nor does Little Bee Scents assume responsibility for use or reliance upon this data. This SDS is current to the date listed above. However, the GHS classifications may change due to hazard communication updates by the overseeing governing body. For the most current SDS information please contact [marsha@littlebeescents.com](mailto:marsha@littlebeescents.com).
