What are COOP CONTROLS® Automatic Door Openers?

They are easy to install kits that automate swinging chicken coop doors. They work off a photosensor which will automatically open the coop door at sunrise and close the coop door at sunset.

Why should you invest in one?

CONVENIENCE. EVERYONE IS BUSY.

Now you can take your life back and enjoy the things you may have put on hold such as:

- Attending events for your children
- Meeting family and friends out for coffee or a bite to eat.
- Going out of town on vacation.
- Sleeping in late on the weekends, especially in the winter months when it's cold outside!

Keep your Chickens In and Predators Out

All animals that live in a coop are prey by predators in our environment. These predators can include hawks, foxes, raccoons, and even coyotes. This is why it's important to have layers of safety in place for your chicken coop.

One important safety layer is having a tight and secure coop door. When installed correctly a Coop Controls Automatic Coop Door Opener will keep your flock safe at night with our patent-pending door technology. We can't keep the predators away, but with a Coop Controls Automatic Coop Controller we can give you peace of mind.

How Does The Built-In Photosensor Work?

EVERY MORNING and EVENING...

The photosensor will automatically open the coop door at dawn and close the coop door at dusk. It does this by measuring the available light with our patent-pending intelligent system.* The system will automatically adjust each day to the changing sunrise and sunset times by sensing both the visible and invisible light, before it will trigger the coop door to open or close. It continues to work even when it is raining, snowing, or cloudy outside. Our proprietary software is typically accurate to within 20 minutes of the published sunset time for your location.

*You can adjust the opening and closing time of the coop door by up to 60 minutes using the delay open and close dials on the control board.

Kit Details*:

- Works on swinging coop doors from 16"-30" wide
- Automatically opens coop at dawn and closes at dusk
- Adjustable delays to open and close coop door
- Easy install with common tools
- UL listed ac transformer, included
- Includes battery which allows for additional reliability when ac power is out
- Solar compatible*

Kit Includes:

- Coop door swing arm, installation brackets, control box, battery, push-button, ac transformer, 3' and 10' wire and hardware included.
- 12 month warranty.

Requires (1) wood 2x4
