Hammerhead Li-Ion Rechargeable Screwdriver with Circuit Sensor™ Technology

- Takes the uncertainty and guesswork out of working around electricity -

(CHICAGO) — Hammerhead is excited to announce the launch of their new 4 volt Lithium Ion Rechargeable Screwdriver featuring Circuit Sensor™ Technology, combining the go-to DIY tool with the ability to detect live current at the push of a button. This new tool incorporates all the features and capabilities of a compact screwdriver, and state-of-the-art live wire sensing technology designed to keep DIY'ers safe.

The 4 volt Lithium Ion Rechargeable Screwdriver is an innovative solution to a common problem addressing fear when working around electricity. The Circuit Sensor™ Technology detects live wires up to 1 inch away in outlets, switches, cords and fixtures taking the guess work out of which electrical breaker needs to be turned off during a project. The Hammerhead screwdriver is the only product on the market to offer this advanced technology.

“Our research showed the number one fear DIY'ers of any skill level share is working around electricity. To address this concern, we combined the go-to DIY tool with a non-contact voltage detector providing consumers confidence in tackling electrical projects and convenience when completing them” said Joe Turoff, VP of sales and marketing for Hammerhead. “The Circuit Sensor™ Technology not only helps keep users safe but eliminates the need for additional tools during a project, saving time and energy.”

In addition to the advanced capability, the screwdriver also integrates the functionalities of multiple tools into one, making it easier for users to work smarter and faster. The integrated wire stripper and wire bender add convenience and functionality, while the compact design with LED work lights, make it easy to work in tight dim lit spaces. The tool is powered by a 4 volt Lithium Ion battery, which is conveniently rechargeable with a USB cable cord.

Hammerhead's mission is to create tools to help the DIY'er get the job done smarter, faster and easier.

About Hammerhead

Hammerhead Tools solve common problems in new and innovative ways. Every Hammerhead tool or accessory gives you a new way to get the job done and do it smarter, faster and easier. Hammerhead Tools are designed, engineered and brought to life by Chervon, one of the world's largest manufacturers of electric power tools and related products. For the past 20
