COMPONENTS CHECKLIST

6. USB-C charging cable

CHARGING THE BATTERY

The unit is powered by its own built-in battery. Plug into power source via USB-C cable to charge/recharge.

When the battery is low, the light indicator will be solid red.

When the battery is charging, the light indicator will blink red.

When the battery is fully charged, the light indicator will be solid white, and the unit can be disconnected from the power source.

HOW TO USE

- Wash soother (or small item to be sterilised)
 to remove debris before sterilisation.
- Place soother teat side up into unit (refer to diagram a), then close the lid. NOTE: This unit is only suitable for sterilising 2 soothers at any one time.
- Press the power button once and wait 49 seconds, the 49s logo will be visible on the screen. When sterilisation is complete the light indicator will blink and automatically switch off
- Open lid and remove the items with clean hands.

IMPORTANT – if the lid is opened during a sterilisation cycle, the steriliser cycle will need to begin again. Press the power button to switch off the unit, then press the power button again to re-activate the sterilisation cycle.
