## **IMPORTANT, RETAIN FOR FUTURE REFERENCE: READ CAREFULLY BEFORE USE.**

### **For your baby's safety and health WARNING!**

Keep all components not in use out of the reach of children.

Inspect before each use. Pull the soother in all directions. Throw away at the first sign of damage or weakness.

Only use dedicated soother holders tested to EN12586. Never attach other ribbons or cords to a soother, your child may be strangled by them. Never dip in sweet substances or medication, your child may get tooth decay.

In the event that the soother becomes lodged in the mouth, **DO NOT PANIC!** It cannot be swallowed and is designed to cope with such an event. Remove from the mouth with care, as gently as possible.

Do not store or leave in direct sunlight or near a source of heat, or leave in sterilising solution for longer than recommended, as this could weaken the teat.

Before first use and after every use, wash the soother in warm soapy water or in the top rack of your dishwasher. Always squeeze the teats after cleaning and sterilising to ensure any trapped water is removed.

Top rack dishwasher safe (max. 65°C).

Suitable for all methods of sterilisation.

Do not use abrasive or solvent based cleaning agents as this may cause damage.

To store your soothers when not in use, keep them in a dry, covered container out of direct sunlight.

Replace the soother between 1 & 2 months of use for safety and hygiene reasons.

Complies to EN 1400.
