Our dedication is in creating , our competence is in Engineering

FF 109X

The FF109X is **2 hour approved** for every major ceiling assembly including gypsum, sheetrock, drywall, acoustical tiles and suspended ceilings with any joist spacing up to 24 inch on center.
The enclosure is made out of an intumescent material which will be activated in case of a fire, stopping both, flame spread and heat transmission for two hours.

BENEFITS

ULC Approved

Expands inside closing the gap in case of a fire

Cost Reduction

Light Weight

No Sealant Required

Easy Installation

Flexible Material

Manufactured and Engineered in a Factory Production

BUILDING CODE REQUIREMENT

3.1.8. Exposure Conditions for Rating

" (2) **Openings** in a fire separation **shall be protected with closures**, shafts or other means."
