

MEDICAL GRADE FACIALS MENU

-Onyx HydraFacial™

HydraFacial™ is an advanced clinical grade hydra-dermabrasion treatment designed to deeply cleanse and exfoliate the skin. The multi-step process purifies, hydrates and performs painless extractions, improving skin's texture and tone. Enriched with elements of touch and LED light therapy, skin elasticity is improved leaving skin plumped and invigorated. 75-minute includes treatment of the neck and décolleté, including a specialty serum to reduce damage, redness and signs of aging

- \$275

-Onyx HydraFacial™ Deluxe

Deluxe HydraFacial® uses patented technology to cleanse, extract, and hydrate the skin by cleansing and exfoliation from our Signature Hydrafacial and now comes with the added benefit of a Booster Serum picked for your individual skin concern, plus healing, restorative LED light therapy sessions.

- \$320

-Hydra Microderm Facial

The Hydra Microderm Facial is an exfoliation treatment designed to remove the upper layers of damaged and dying skin cells, which tend to give your skin an overall dull appearance and betray signs of sun damage. This treatment will target specific problems like dark spots on face, acne scars, and hyperpigmentation induced by age, the sun, and pregnancy. After the top layer of skin cells has been removed, the skin should look more radiant and should feel refreshed. Further, many of our clients find that the need to use large quantities of makeup decreases with improved texture and elimination of skin imperfections.

- \$275

-HydraFacial™ Keravive Scalp Treatment

An unhealthy scalp is a significant cause of hair loss, shedding, and thinning hair. When the hair follicles become clogged with dead skin cells and debris, it can lead to poor circulation, inhibiting the body's natural ability to create thick, gorgeous locks. The HydraFacial Keravive scalp treatment employs cutting-edge vortex technology to exfoliate and replenish the scalp, extracting debris while jumpstarting cellular renewal.

- \$300

-Renew and Refresh Facial Dermaplaning

Dermaplaning can help reduce the appearance of acne scars or other skin imperfections by revealing newer, undamaged skin. The benefits are dewy skin, faster cell turnover, and a smoother texture. A recommend treatment to anyone who is about to undergo a laser treatment or deep chemical peel, to allow the products to penetrate more deeply into the skin. Plus, the light shaving motion gets rid of little facial hairs while it exfoliates.
