## MEET THE STAFF

### **Tom Balding** | 39 years experience

After years of honing his metallurgical skills in the aerospace and sailing parts industries in Southern California, Tom Balding chose the quieter life in Sheridan. Now, 30+ years later, Tom ranks among the most revered and imitated bit-and-spur makers in the country. Tom fully enjoys his home and likes to backpack and explore the mountains, plus spend time with his three children Christal, Eva Marie and Chester.

### **Justin Massar** | Bit Technician, 24 years experience

A former ranch cowboy and farrier, Justin enjoys working with his hands. He is instrumental in creating bits, overseeing the process start-to-finish. He's also a skilled engraver, adding his artistic touch. "For those who appreciate craftsmanship, hand engraving is something they really cherish." said Justin. Justin and his wife, Kathleen, have a son, Jake. Outside of work, he enjoys fishing, hunting and backpacking in the mountains.

### **Sam Davidson** | Spur Technician, 32 years experience

Sam specializes in spur making, from assembling the basic parts to final finish. He learned machining and welding at Sheridan College and on the job with Tom Balding. A native of Sheridan, Sam credits his dad and granddad for his career direction. "They were home mechanics, building things just came naturally to me," he said. He enjoys outdoor pursuits, hockey, playing bluegrass guitar and mandolin.

### **Ray Frigo** | Component Production, 4 years experience

You will usually find Ray with a big smile on his face as he loves the work he does with all intricate parts and manufacturing that goes into the bits and spurs. He retired from Powder River Energy and after a tour of the shop, came to work part time as a machinist. Outside of work Ray loves to be in his shop working on various projects with his street rods. He and his wife Cyd love to take spontaneous adventures with their fur babies.

### **Hayden Burgess** | Technician, 2 year experience

Hayden is a Sheridan Wyoming native. He graduated from Sheridan College with his welding degree and is getting lots of time polishing and welding. He is still learning the ropes and how much really goes into our bits and spurs here in the TBBS shop. In his time off, he is an outdoor enthusiast, enjoying anything outdoors from camping, hunting and dirt bikes.

### **Kelli Anderson** | Office Manager, 25 years experience

Often the first point of contact for new customers, Kelli manages the business office: answering phones, taking orders, responding to emails, shipping, helping with customer service, and managing the books. A native of tiny Lodge Grass, Mont., Kelli grew up on a cattle ranch and remains a cowgirl at heart. She and her husband enjoy spending their free time hiking and traveling.

### **Kati Evers** | Photography & Marketing, 8 years experience

Kati is an integral part of our team; from customer service, orders, shipping, and photography, to gift shop displays. She's a Wyoming native and proud to call Big Horn, Wyoming home. She loves learning new skills and is always up for a challenge. In her time off she enjoys outdoor activities with her family including: spending time in the mountains, horseback riding, gardening, fishing, and hunting.

## WHAT SETS US APART

### Leading the Industry:

We craft state of the art bit and spur designs backed by industry leading technology and innovation for riders seeking a balanced product that offers ease of use, quick response, better movement, and longer product life. We work directly with world class professional riders and trainers to ensure all your needs are met. We are the best, and though often copied we are never duplicated.

### Our Spirit & Core Values:

Passion to do what is best for the business and everyone impacted by the business – our customers, employees, and community.

- Quality & pride in everything we do
- Care & respect for one another and the community
- Elite product that sets the standard in our industry
- Attention to craftsmanship, design, and materials
- Entirely made in the United States of America

We offer three pin rowel pin styles: standard (welded in place), cotter pin, and threaded.

Tom Balding has a long history of combining welding and metal work with art and function. He grew up in Southern California and at a young age spent a lot of time in his father's welding shop. At 18 he started working at Hooker Headers as a production line welder and fabricator. Within a few months, management appreciated his skills and moved him to the custom department where he was building beautiful exhaust systems for exotic cars. Near the end of the 60's he was also involved in the development of sailboat hardware for his cousin Hobart Alter, better known as Hobie.

In 1973 Tom was certified to weld government aircraft parts and he started his own precision TIG welding business. Business boomed. However, welding thousands of parts and the growth and crowding of Southern California finally took its toll and in 1980 Tom decided to make the big change. His love of the outdoors and an interest in horses steered him to the small (very small!) town of Ucross, Wyoming, population twenty-five.

He bought a 2-year-old colt and a book on breaking and training. A few months later he was riding everyday doing assorted ranch work and volunteering for anything as long as he could ride his horse. Making a living in the cowboy state was a challenge; odd jobs, ranch work, carpentry. Nothing really panned out. However, one afternoon a knock on the door would mark a dramatic turn in his life. Standing there was the neighbor lady holding a broken bit; asking if he could weld it back together. Tom instantly knew what he was going to do. The next day he drove thirty miles to town to order business cards and Tom Balding Bits and Spurs was born. As they say: "The rest is history."

Today, although the business has expanded, Tom Balding and his small devoted team strive to maintain the highest standard in craftsmanship, design and materials. He works directly with world class professional trainers and riders to ensure precision, tradition and passion come together to produce the finest products. Proudly made in Sheridan, Wyoming USA.
