# Safety Precautions

## Please read this carefully

For use on residential entry doors. Not to be used where the internal escutcheon will be exposed to outdoor elements (e.g. on a gate).

Do not attempt to disassemble the digital door lock by your self. By doing so, you may get an electronic shock and damage the product.

Do not use water and any type of solvent to clean the product such as gasoline or benzene as they can cause damage to electronic circuit, deterioration and or paint peel-off.

Do not use force with a tool onto the product.

Please keep your Code safely.

Make sure to lock the door tight when you go out.

Be careful not to hit the handle as it may cause injuries.

For total peace of mind, please store your back up key in a safe & convenient place after the door installation is complete.

Immediate re-registration of all remaining keys is required to invalidate the lost key.

### ⚠ Caution

Make sure to follow the above instructions to avoid any injuries or damages on the properties .

# Product Features

---

## 1 Alarmed Door Lock

Yale Digital door lock has a built in damage alarm. If the keypad area is damaged an alarm will sound.

## 2 Proximity card identification

You can use your ISO 14443 A type RFID card such as credit card or pass card as your card key.

## 3 Electronic Code System

You can open the door conveniently with Code.  
Yale Digital door lock gives you the freedom and convenience of key-free.

## 4 Emergency power back up

9V battery source is available if your batteries run out.

## 5 Fake PIN Code

To prevent the Code being exposed.  
Yale Digital door lock allows you to enter decoy numbers before or after entering your Code.

## 6 Auto Locking

The handle automatically disengages on the outside once you have entered your home, preventing anyone from following you.

## 7 Remote control System (Optional)

Use a Remote control to unlock/Lock your door "remotely".

## 8 Zwave / Zigbee (Optional)

Use them to connect with Controller.

## 9 BLE (Optional)

Use it to pair with Smartphone.

### Note

Enter the Code in case you lose the card key or you are not carrying it.

※ It is a user's liability to break the lock because the user did not register any Code.

When the Yale Access Module and Yale Bridge are registered to your lock, the PIN codes and Card / Tag keys must be registered using the Yale app.

# How to Use

Normal mode

Advanced mode

## Emergency mechanical key override

Operate the lock with the mechanical key when there is a problem with the lock.

Such as :

- Forgotten User Code
- Electronic malfunction

Pull down the emergency cover

## Product malfunction

Press reset button located in the left of [emergency power terminal] with a pin and try again with the key or the security code. If it still does not work, call for after-sales service.

## Resetting Lock to Factory Default

When lock is reset to factory defaults all user codes (including the Master Code\*) are deleted and all programming features are reset to original default settings (see below).

1. Remove the battery cover and batteries.
2. Remove the interior escutcheon to access the reset pads.
3. The reset pads are located on bottom of the PCB board (See image)
4. While pressing the reset pads with tweezers, reinstall batteries and release reset pads with tweezers.
5. Replace battery cover.

Upon reset, the Master Code creation is the only option available and must be performed prior to any other programming of the lock.

# Emergency Power

## Emergency power supply for discharged batteries

In case the batteries are dead, you can open the door by using 9V battery as shown.

» To supply emergency power

Place the 9V battery onto the emergency power supply terminal.

Touch the keypad with your palm.

Enter the registered Code on the keypad.

Touch the keypad with palm or Press [\*] button to confirm and replace the batteries.

## Power supply

### 1 Expiry period

The product uses four 1.5V alkaline AA batteries. They may sustain 1 year if used 10 times a day. (Users are advised to use authentic alkaline batteries.)

### 2 Low battery alarm

You must replace all 4 batteries in the following cases:

- \* The Low Battery LED on keypad flickers red.
- \* When low battery notification message is played.

**RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE NATIONAL CODE OR RECYCLING PROGRAM**

### Note

- The battery life varies according to ambient temperature, humidity, the frequency of use, and the quality of the battery.
- Do not use rechargeable batteries. Only alkaline batteries are recommended.
