	Enter User Code (4 ~ 10 digits)								
	Enter Master Code (4 ~ 10 digits)								
	Enter Visitor Code (Only 4 digits)								
	Enter Onetime Code (Only 4 digits)								
UN	User Slot Number should be 2 digits (like '01' '99' and '00': Location of 100th user slot must be assigned '00' instead of *100'.)								
	Rotation area to add more features								

8. Product Features

One-touch Fingerprint Verification Easy Scan by Goodix fingerprint solution: Live finger detection and secure matching The leading liveness performance improves the security of Yale smart lock dramatically.
Yale Access Bluetooth App (Yale Access BLE module: optional item) This service is an innovative solution provided by YALE. Using high-tech IoT technology, user can access and unlock the digital door lock with your smartphone.
Smart Touchpad Automatic Locking The automatic lock sensor detects the door closing and locks the door automatically within 5 seconds. The door locks when touch the keypad with the palm. As the automatic lock function does not work in manual lock mode, make sure to check that the door is securely locked when leaving the premises.
3 minute Lock Out Feature After five (5) unsuccessful attempts of an invalid code or fingerprint, card key lock out mode is activated for 3 minutes.
Smart Etiquette
Fake PIN Code Security enhancement to enter any number before or after entering a password to prevent the PIN code from being exposed.
Internal Forced Lock It is a security-enhancing function that 'disables' authentication methods such as passwords, RFID cards and fingerprints from outside when setting up functions indoors.
External Forced Lock. It is a security-enhancing function that an alarm goes off if someone opens door from inside when setting up functions outside.
Voice Guide Feature
 Other features and Benefits Remote Controller (Optional): This option may not be available depending on your country or local dealer. Network Module/Controller (Optional): It allows door lock to connect with Home network controller. Intrusion/Broken Alarm. Low Battery Alarm and Emergency Power Supply.

9. Normal Mode (Default Mode)

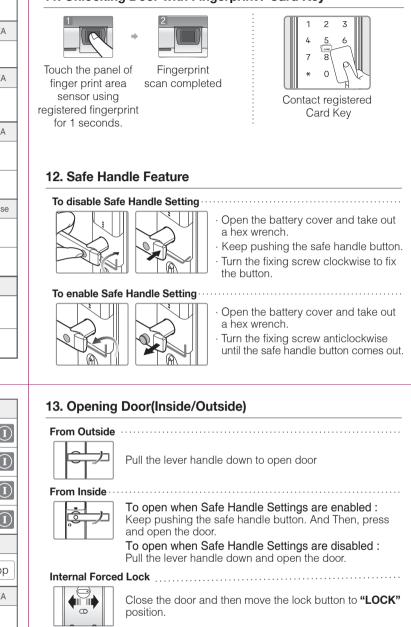

Normal mode is a convenient mode for anyone to set the digital door lock. User can set password like user code, visitor code, onetime code and register user's fingerprints, card keys as well. Factory default is a normal mode.
