## **Estate Fencing**

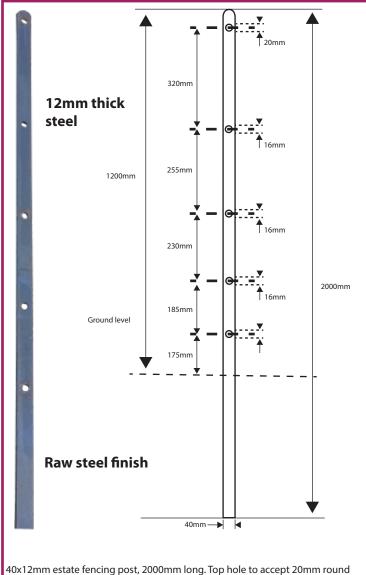

## Estate fencing posts and rails

Estate fencing posts and horizontal rails. All posts are 40x12mm offering a strong and stable structure and are designed to be driven into the ground by 800mm. Concreting the posts in is also an option and may require you to cut the bottom of the post down to suit.

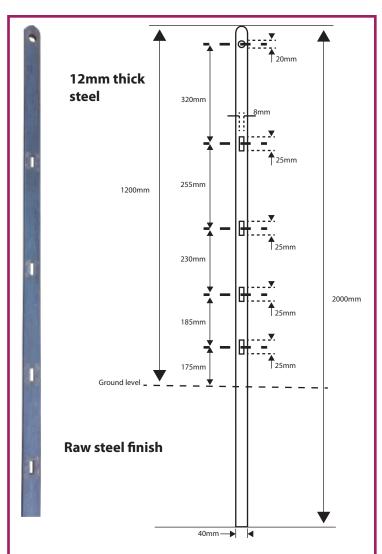

2 main posts are offered: one to accept  $4 \times 16$ mm round bar with a  $1 \times 20$ mm round top rail and the other to accept  $4 \times 25$ x8mm flat with a  $1 \times 20$ mm round top rail. We recommend post spacing at approximately 1.0mtr.

Posts and rails are available from stock with a natural steel finish which will rust over time to give a rustic look and feel or may be hand painted once installed if desired.

40x12mm estate fencing post, 2000mm long. Top hole to accept 20mm round bar. 4x lower holes to accept 16mm round bar. Rounded post top. Raw steel finish.

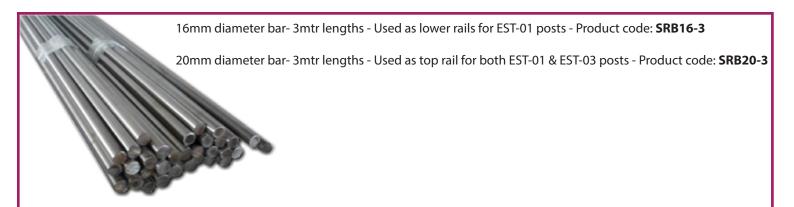

Recommend dig into ground 800mm with 1mtr post spacings. If concreting post in, bottom of post may need cutting down.

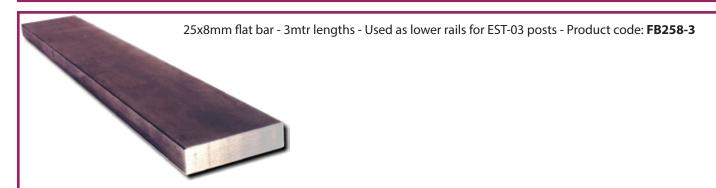

40x12mm estate fencing post, 2000mm long. Top hole to accept 20mm round bar. 4x lower holes to accept 25x8mm round bar. Rounded post top. Raw steel finish.

Recommend dig into ground 800mm with 1mtr post spacings. If concreting post in, bottom of post may need cutting down.

All bar is supplied with natural/raw steel finish for painting after installation or to leave and form a rust surface for a rustic effect.
