△△△

A skin care system that is responsible from beginning to end for professional care

01.

POST CARE HISTO CELL CREAM

Post Care HISTO Cell cream is specially formulated to help promote rapid healing of damaged skin following laser procedures and provide the firm line of defense for the skin against external infections and pigmentation. For all skin types, especially for damaged skin following dermatologic procedures

- 01. Rapid healing with SRGF H₁ Complex
Promote rapid healing of damaged skin with the growth factors.
- 02. Perfect solution for the scar tissue, firm sagging facial features
Diminish existing scar tissue by activating normal skin remodeling from inside the body with the complex of peptides and Centella Asiatica Extract.
- 03. Stable and effective post procedures (Laser, peeling etc.) treatment
Prevent pigmentation by helping restore cell regeneration and normal skin barrier following procedures.

[Capacity] 12 ml / 50 ml / 500 ml

[How to Use]

- 01. After laser or peeling and dermabrasion procedures: Apply enough amount of HISTO cell cream gently on desired area and smooth the cream over your skin to be absorbed, for the best post laser treatment, it is recommended to apply twice a day for a week
- 02. After toner and essence, use cell cream as alternative of nutrition cream.
Apply it on entire face and smooth with gentle patting.
