Different ways to measure your ring size

## Part 2

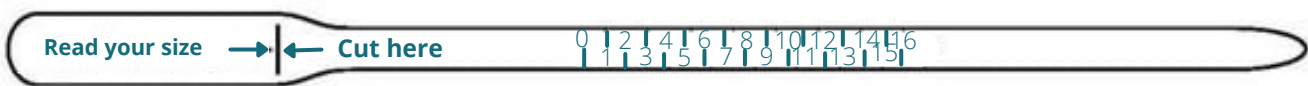

### If you don't have an existing ring that fits

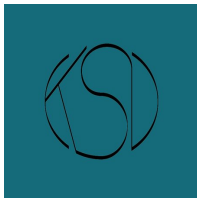

#### A piece of string, wire, or paper

- Take a piece of string, wire, or paper, make sure it doesn't stretch as that can distort your measurements.
- Place the string/wire around your finger and pull it to the right size. Make sure it fits over your finger as if you're putting on a ring. It should be snug, but comfortable.
- Mark or hold it where the end meets the string/wire, and measure the length of the string.
- Measure a few times, at different times of the day as our fingers swell and contract.
- Check the length with the circumference chart on the next page to find out your size.
- When ordering a ring you can always give me your measurements and I can check your size with the length you measured.
