

Apparel Care Instructions

Vinyl Heat Pressed Apparel

Heat-pressed garments tend to require special care to maintain their longevity. Here are some essential washing instructions for your vinyl shirts:

Handwashing:

- Turn the shirt inside out before immersing it in water.
- Use cold water and a gentle regular detergent.
- Avoid bleach and fabric softener to prevent damage to the vinyl.
- Handwashing allows you to control friction and minimize wear on the vinyl design.

Drying and Ironing:

- Hang the shirt to dry after washing.
- Do not iron directly on the vinyl parts; turn the shirt inside out if ironing is necessary.

Remember, following these instructions will help maintain the quality of your vinyl-decorated shirts.
