

Our products practically sell themselves.

K9 Sport Sack started as the first forward-facing backpack dog carrier on the market. But now, we have grown into a global community of dog lovers and a trusted brand, known for our commitment to safety, integrity, and quality. We care about humans, their dogs, and

the life they live together and we believe that nothing should stand in the way of people taking their pets on adventures with them. From backpack dog carriers to travel accessories, our customers love our products, and we know your customers will love them to.

The Urban 3 is quickly becoming a top seller for us with both new & repeat sport sack customers. They love the dual cinch straps, laptop sleeve, & ability to turn this bag into a standard backpack. We are super excited to have this bag in our lineup for the spring & summer.
