# GLASS OPTIONS

## CL - CLEAR - DOUBLE STRENGTH

URBAN33 proudly features 1/8" thick glass. Compare our glass to the glass of our competitors, many of whom use 1/16" thick glass.

## FR - FROSTED

Frosted Glass is created by acid etching or sandblasting clear glass. This covers the surface with micro pits that turn the glass translucent.

## AS - ANTIQUE SEEDY

This textured version of seedy glass from Wissmach Glass gives a classic antique appearance.

## CA - CLEAR ANTIQUE

Our antique style glass features textured striations that show from every angle giving a delightful individual character.

## CH - CLEAR HAMMERED

Rolled glass is sheet glass that has been embossed on one side to resemble beaten metal.

## CS - CLEAR SEEDY

Seedy glass (also known as seeded glass) is made by including air between two sheets of molten glass. The "seeds" are actually a random pattern of small bubbles.

**PRODUCT CODE:**

**L842-MB-FG**

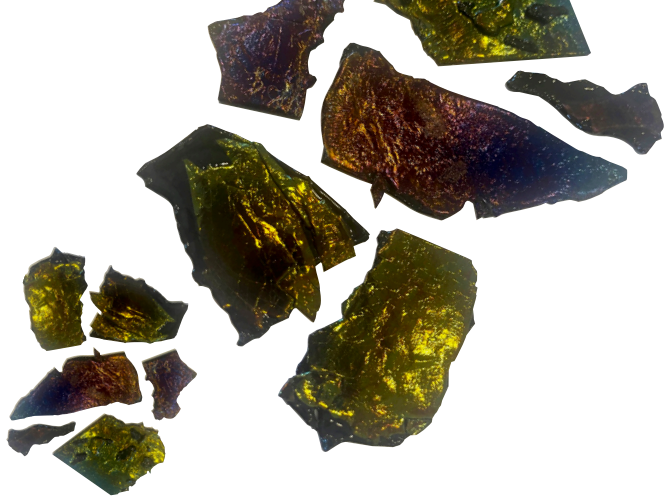

This fused glass insert is created by melting together pieces of glass in a kiln. It is a very delicate process that involves the use of minerals and various heating temperatures to get the desired colors and patterns.

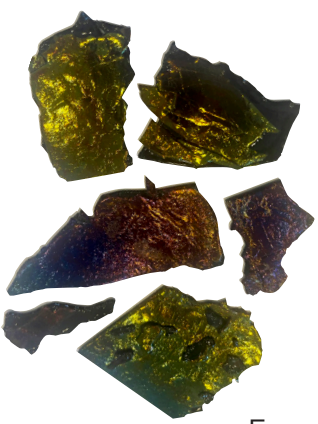

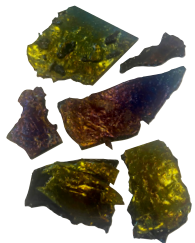

Various glass pieces in different colors and shapes are cut out.

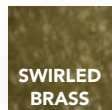

They are then layed out along with other minerals and materials in the desired design and are baked in a kiln.

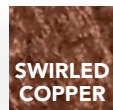

Once melted down, the final result is a one of a kind fused glass insert that is sure to elevate your space. \_\_\_\_\_

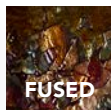

**BACKPLATE OPTIONS:**

SWIRLED  
BRASS

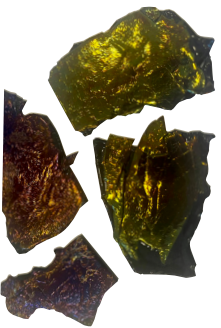

SWIRLED  
COPPER

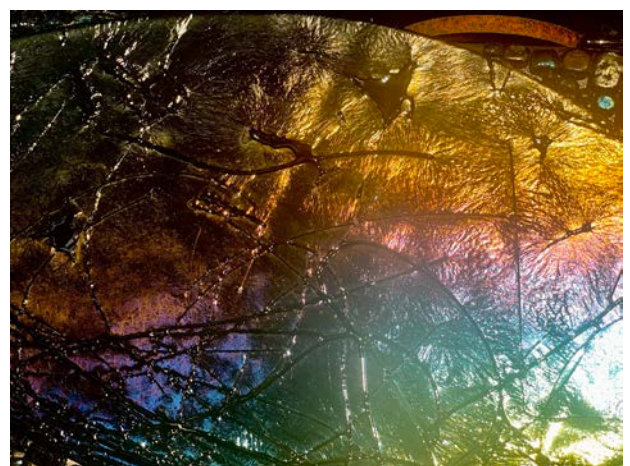

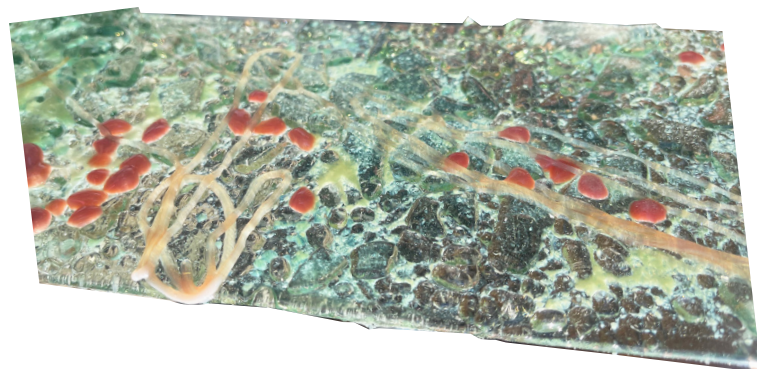

FUSED

For custom inserts please call or email for more information on pricing and designs.

Please see below for examples of custom fused glass inserts.
