Cleaning Made Easy

---

## New Generation of Bionic Hard Floor Cleaner

# Hizero UltimateClean™ Cleaning Technology

Hizero UltimateClean™ technology taps into nature, incorporating bionic based science to deliver an innovative way to clean your homes floor.

The Hizero All-In-One Bionic Hard Floor Cleaner sweeps and mops at the same time in one easy motion. Emulating the way animals lick up liquids and solids, our lightweight, contemporary floor cleaners are energy efficient and whisper quiet.

## High Density Polymer Roller

Our special formulated cleaning roller have a high-density, gentle, and soft design. It does not scratch your floor or leave an odor on it. The moisture-rich and highly water absorbent properties of the roller ensures no excess water stains are left behind.

# What is Hizero Innovation?

## Clean Floors Need a Clean Roller

### Real Time Self Cleaning

#### Sweeps and Mops

The cleaning roller automatically cleans the floor by picking up solids, liquids, hair, and dust.

#### Separation

The brush removes the solids, while the water sink squeezes the liquids from the cleaning roller. The waste is then automatically transferred to separate compartments.

#### Flushes

Polymer cleaning roller is constantly kept clean, by being flushed with clean water.

#### Always Clean

As the cleaning roller rotates, its floor-contact side stays absorbent with clean water, ensuring a pristine clean floor.

## Picks up Solids, Liquids, Hair, and Dust

The Hizero can pick up all the waste in one step and separate it into different compartments, allowing for an easier disposal process.

# What Makes A Hizeru Unique

## Sweeps and Mops at the Same Time

In one easy motion, the Hizeru sweeps and mops your floor simultaneously. No more sweeping before mopping. No more bending. Throw away that old broom and mop.

## No Suction Technology

Picks up all the waste from your floor, via our innovative cleaning roller. Due to our technology, we also don't emit any dust back into your room like a traditional vacuum would.

## Auto Waste Separation

We separate liquids, hair, and solids for correct disposal. Liquids go down the sink, while solids and hair go in the bin. Not only do we simplify floor cleaning, but we also help the environment by disposing of waste properly.

## Quiet Like a Conversation

Our No Suction Technology achieves a quiet 60dB\* noise level, letting you clean your hard floors without disturbing others at home.

## Cordless and Energy Efficient

Utilizing our innovative technology, we consume a mere 34 watts of power. This boosts cleaning time and reduces appliance impact on the environment.

## 80 Minutes

Experience 80 minutes of cordless floor cleaning. Our focus is on minimizing charging time, allowing you more time for cleaning.

## Easy Maintenance

The actual waterproof cleaning head is easy to clean and can be rinsed directly with water.

Industrial Designer  
**Magnus Lundström**

Magnus combined his engineering skill and Scandinavian artistry, to produce a timeless product that reflect environmental awareness and respect for natural materials. At the core of his design ethos, is not only to produce aesthetically pleasing appliances. But to create a design which is functional and simple to use.

## Specifications

**Product Name**  
F100 Bionic Hard Floor Cleaner

**Net Weight**  
9.7 lbs

**Dimensions**  
11.7\*12.2\*45.7 inches

**Charging Time**  
4h

**Clean Water Volume**  
23.7 oz

**Dirty Water Volume**  
25.4 oz

**Noise Level**  
<60dB\*

**Power Consumption**  
34W

**Docking Station Dimensions**  
13.2\*12.1 inches

**Runtime**  
>80min at any speed

**Battery Type**  
Li-ion battery

**Color**  
Onyx, Nordic, Sage, Citrine

\*Sound pressure tested from 1m distance in the Hizeru Lab
