

CASE COMMANDER™ Command System

1-800-205-3473

www.ajstone.com

The Incident Commander must coordinate many activities in rapid succession and in order to do this you need a well designed command system. Many Chiefs in large and small cities and towns across the Country use a case style command system to manage their incidents. This allows the Incident Commander to position the Command Post with the best view of the scene.

The Case Commander™ Command System will allow the I.C. to easily track assignments of personnel and apparatus through the use of the National Incident Management System. Large or small incidents can be managed with this system. Fill out your Command and General staff only as necessary.

The dry erase surface has space for size-up notes, strategic & tactical planning, assignments, PAR, special hazards, tactical considerations etc..

The I.C. will sketch a layout of the incident then place the magnetic tags representing Apparatus, Officers & Crews onto the board in the positions of their assignments. Then the I.C. can track all fireground Groups and Divisions as well as the Officers leading them.

A timer clock with an alarm tracks time and facilitates prompt PAR reports

Included are 50 custom engraved magnetic tags representing your apparatus and officers. These tags are typically engraved with the Radio designations of all Department Officers, Apparatus as well as common Mutual Aid providers.

Features:

- Fully N.I.M.S. compliant
- Heavy duty case
- Built in wheels and legs
no separate pieces to store
- Large Clock with timer and alarm
- LED light
- Large Dry Erase surfaces printed with
Incident Command worksheet
- 50 Custom Engraved Magnetic Tags
- Dry erase markers and eraser included
- Storage area below lower board

Case Commander™ Accountability Board

The Case Model is designed to mount on the front of our Case Commander™ Incident Command System. It comes with 16 rings and sections for collecting Accountability Tags and recording team assignments.

The entire surface of the board is dry erase marker compatible and stores inside of the Case Commander™ below the bottom board.
