RESCUE SYSTEMS

EFORCE

Genesis 28v 5 Ah Battery *powered by Genesis* **Part #: ART.107.289.3**

Genesis Rescue Systems offers two battery options. End users can choose from the Genesis proprietary battery system or our most popular option, the Milwaukee 28v battery system. Genesis users will never have to worry about discontinued products from third party companies. The manufacturing of our battery is completed in the same factories as our competitors. The Genesis proprietary battery uses the same number of battery cells as the Milwaukee 28V and users will see no difference in performance. The user can also swap between both battery systems seamlessly.

Specifications

Nominal Voltage: 25.2v

Amp Hours: 5 Ah

Watt Hours: 145 Wh

Weight: 3.2 lbs

Length: 3.3 inch

Width: 3.2 inch

Height: 5.3 inch
