

MSA Advantage[®] 290 Respirator for First Responders

User Protection & Source Control—with all the Benefits of Elastomeric Respirators

The MSA Advantage 290 Elastomeric Half-Mask Respirator provides first responders with an innovative and secure respiratory solution. With the elimination of an exhalation valve, the Advantage 290 Elastomeric Respirator achieves source control by filtering exhaled breath to help reduce the likelihood of contaminating the surrounding area. It also enables user protection up to P100 level and is designed for easy cleaning and decontamination. For the fire service industry, the MSA Advantage 290 Elastomeric Respirator offers a cost-effective and eco-friendly alternative over disposable filtering facepiece respirators.

USER PROTECTION & SOURCE CONTROL

Up to P100 level user protection available. The elimination of the exhalation valve provides filtration of exhaled breath.

WHAT IS SOURCE CONTROL?

Source control protects others by reducing the spread of respiratory droplets when the user speaks, coughs, or sneezes.

WHEN YOU GO IN, WE GO IN WITH YOU.

EASY CLEANING & MAINTENANCE

With only three key components, cleaning and sanitizing masks is simplified. A reusable mask reduces waste compared to filtering facepiece respirators.

REDUCTION OF STORAGE SPACE

Reusable elastomeric respirators may occupy a fraction of the storage space needed for stockpiling disposable N95 respirators.

Ordering Information

Part Number	Description
10217165	Advantage 290 Respirator, Small
10217166	Advantage 290 Respirator, Medium
10217167	Advantage 290 Respirator, Large
