

Before you start make a warm bed by using Biobizz® substrates

Start using fertilizers when your baby plant is 10-15 cm or has 2-4 leaves

A pH-value between 6.2 and 6.5 is ideal  
Controlled pH-value between 6.2 and 6.3

Water 2-3 times a week, no need to water till run-off

You can mix several fertilizers in the same feeding water

We recommend to use our Calmag supplement every watering when growing with RO or very soft water or once a week in case of noticing Ca/Mg deficiency signs

Follow this schedule when using

## ALL-MIX\*

	WK 1	WK 2	WK 3	WK 4	WK 5	WK 6	WK 7	WK 8	WK 9	WK 10	WK 11	WK 12

\* It is beneficial to replace Bio-Grow® with Fish-Mix™ in the vegetative phase but switch to Bio-Grow® when you want to trigger flowering.

\*\* For every system: soil, hydro & aeroponics.

\*\*\* Alg-A-Mic™, Acti-Vera™ and Fish-Mix™ can also be applied as a foliar, 1-3 times a week until the second week of flowering.

Dose: When using 1 or 2 of the products: 1-2 ml/L water of each. When using all 3 products: max. 1 ml/L water of each.

Microbes: Application once a week. Twice a week during high nutrient demand in growing and flowering stage.
