

Standard Growing Schedule: UK Special Mix Light & Custom No Perlite

- Do not overdose your nutrient solution with **Ultra PK** and **Ultra MG**. They are highly concentrated and this will create an imbalance in your NPK levels.
- Flush with only water in the last week to complete the cycle as the media will still hold some nutrients.

Adjust the dosage slightly if starting water values are much higher or lower than 0.6 EC.
Adjust PH according to your style of growing.
